*The Museum Educator's Manual* Anna Johnson, Kimberly A. Huber, Nancy Cutler, Melissa Bingmann, Tim Grove, 2017-08-09  
The Museum Educator's Manual addresses the role museum educators play in today's museums from an experience based perspective. Seasoned museum educators author each chapter emphasizing key programs along with case studies that provide successful examples and demonstrate a practical foundation for the daily operations of a museum education department no matter how small. The book covers volunteer and docent management and training, exhibit development, program and event design and implementation, working with families, seniors and teens, collaborating with schools and other institutions, and funding. This second edition interweaves technology into every aspect of the manual and includes two entirely new chapters, one on Museums: An Educational Resource for Schools and another on Active Learning in Museums. With invaluable checklists, schedules, organizational charts, program examples and other how-to documents included throughout, The Museum Educator's Manual is a must have book for any museum educator.

## **Surveillance Valley** Yasha Levine, 2018-02-06

The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy but using new information technology to understand their motives and anticipate their movements. This idea, using computers to spy on people and groups perceived as a threat both at home and abroad, drove ARPA to develop the internet in the 1960s and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech industry giants like Google, Facebook, and Amazon, revealing how these companies spy

on their users for profit all while doing double duty as military and intelligence contractors Levine shows that the military and Silicon Valley are effectively inseparable a military digital complex that permeates everything connected to the internet even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden With deep research skilled storytelling and provocative arguments Surveillance Valley will change the way you think about the news and the device on which you read it

**Weaponizing Cyberspace** Nicholas Michael Sambaluk,2022-02-04

The Russian regime's struggle for internal control drives multifaceted actions in cyberspace that do not stop at national borders Cybercrime technical hacking and disinformation are complementary tools to preserve national power internally while projecting effects onto myriad neighbors and rivals Russian activity in the cyber domain is infamous in the United States and other Western countries Weaponizing Cyberspace explores the Russian proclivity particularly in the 21st century for using cyberspace as an environment in which to launch technical attacks and disinformation campaigns that sow chaos and distraction in ways that provide short term advantage to autocrats in the Kremlin Arguing that Russia's goal is to divide people Sambaluk explains that Russia's modus operandi in disinformation campaigning is specifically to find and exploit existing sore spots in other countries In the US this often means inflaming political tensions among people on the far left and far right Russia's actions have taken different forms including the sophisticated surveillance and sabotage of critical infrastructure the ransoming of data by criminal groups and a welter of often mutually contradictory disinformation messages that pollute online discourse within and beyond Russia Whether deployed to contribute to hybrid war or to psychological fracture and disillusionment in targeted societies the threat is real and must be understood and effectively addressed
