## Where Do I Start?

The theme for the year is Apple Intelligence. Start by watching the Platform State of the Union.

- ❑ [Platform State of the Union \(SOTU\)](#) [\(main recap\)](#)

## You don't have to learn everything new today!

There are over 100 sessions and a lot of new stuff to learn. You may feel like you're getting left behind. Don't let it overwhelm you. You've got time. The new APIs need iOS 18 and some features are coming later this year. Don't bore yourself out trying to keep up!

## Watching the sessions

I watch the videos using the Apple Developer app. It's available on macOS and iOS. The video player supports from 0.5x to 2x playback, many videos have transcripts and support copying of the content. [sample code](#). You can also watch on [YouTube](#).

There are a lot of sessions, but many are short (10-20 minutes). There's no padding and Apple's engineers get to the point quickly.

## Swift

Swift is ten years old and the big news this year is Swift 6.

- ❑ [What's new in Swift](#) Swift 6 language mode. Static Linker SDK for Swift. Swift Testing open source testing library. Explicit module builds. New organisations on [github.com/swiftlang](#). Language updates for noncopyable types, embedded swift, C++ interoper, typed closures, data race safety.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
