Apps FAQs Final Thoughts     *The Aeroplane* ,1923     *Field and Stream* ,1927     Towards a neuroscience of social

interaction Ulrich Pfeiffer,Bert Timmermans,Kai Vogeley,Chris Frith,Leonhard Schilbach, The burgeoning field of social

neuroscience has begun to illuminate the complex biological bases of human social cognitive abilities However in spite of

being based on the premise of investigating the neural bases of interacting minds the majority of studies have focused on

studying brains in isolation using paradigms that investigate offline social cognition i e social cognition from a detached

observer s point of view asking study participants to read out the mental states of others without being engaged in

interaction with them Consequently the neural correlates of real time social interaction have remained elusive and may

paradoxically represent the dark matter of social neuroscience More recently a growing number of researchers have begun

to study online social cognition i e social cognition from a participant s point of view based on the assumption that there is

something fundamentally different when we are actively engaged with others in real time social interaction as compared to

when we merely observe them Whereas for offline social cognition interaction and feedback are merely a way of gathering

data about the other person that feeds into processing algorithms inside the agent it has been proposed that in online social

cognition the knowledge of the other at least in part resides in the interaction dynamics between the agents Furthermore

being a participant in an ongoing interaction may entail a commitment toward being responsive created by important

differences in the motivational foundations of online and offline social cognition In order to promote the development of the

neuroscientific investigation of online social cognition this Frontiers Research Topic aims at bringing together contributions

from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and

sometimes two brains rather than single individuals and brains responding to a social context Specifically this Research

Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the

putative differences in the recruitment of underlying processes and mechanisms Here an important focal point will be to

address the various roles of social interaction in contributing to and at times constituting our awareness of other minds For

this Research Topic we therefore solicit reviews original research articles opinion and method papers which address the

investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so While focusing

on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies

psychophysiological investigations methodological innovations computational approaches developmental and patient studies

By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social *Forest and Stream*, 1916 **Proceedings of the ... web sep 5 2022 our transformer size calculator can find the right transformer size single or three phase for any load you require within this short text you will learn the working principle of transformers how to size a single phase transformer how to calculate transformer size for a three phase transformer and more

**selection and sizing of transformers made easy electrical** - Jul 02 2022

web the kva rating can be calculated using the following formula for single phase transformers kva load voltage x load current  $1000 \times$  load power factor for three phase transformer kva  $1.723 \times$  load voltage x load current  $1000 \times$  load power factor try online kva calculator operational frequency

**how to size a transformer calculate the rating of transformer** - Oct 05 2022

web calculate the size of the single phase transformer solution secondary voltage 240v load current 62 5a transformer rating  $p \times v \times i$  putting the values  $p = 240v \times 62.5a = 15000 \text{ va}$  15 kva sizing a three phase transformer rating of a three phase transformer  $p = 3 \times v \times i$  where  $v$  primary or secondary voltage
