The Spaces That Never Were in Early Modern Art Jelena Todorović,2019-08-15 Throughout history the research of space has always been an issue of great interest Since classical Antiquity the physical space itself and its imperfect double the illusionary space used in the visual arts have been one of the perpetual obsessions of man However there are very few studies that question the reality of represented space and deal with those liminal phenomena that exist on the blurred boundary between reality and imagination Such spaces were never defined by carefully drawn borders they were usually outlined by the ephemeral and ever changing barriers For that very reason liminal spaces describe those curious worlds confined in gardens and collections they underpin all those dreams of ideal societies and construct visions of unobtainable and distant shores Liminal spaces are the territories not usually found on maps and in atlases they are not subjected to laws of perspective and elude the usual representations They are always beyond and behind the established depiction of space Often they possess yet another layer of signification that transforms a mere image of nature into a political manifesto the lines on precious stones into the shapes of vanished cities and private art collections into a dream of absolute power This book explores different representations and forms of liminal spaces that on the one hand deeply influenced the history of the early modern imagination and on the other established the models for our own understanding of liminal spatial phenomena

Motifs in Art as Agents of Meaning Arthur Crucq,2026-01-15 Departing from a metaphorical comparison by Renaissance architect Leon Battista Alberti between the underlying principles of drawing and weaving this book will show how seemingly abstract motifs in their realization already acquire the potential to refer to content This opens a new perspective on the so called distinction between abstract and representational and the extent to which various motifs in art can be regarded as representations Based on recent insights from the fields of anthropology archaeology psychology and semiotics it will furthermore become clear how the essentially abstract elements of art motifs can set in motion processes of meaning making and as such function as agents which implicitly emphasize that abstraction exactly shows how representation works
