*F-105 Thunderchief MiG Killers of the Vietnam War* Peter E. Davies, 2014-10-20 An illustrated history of the F 105 s success against MiGs a relatively little known aspect of the Vietnam War and a testament to the jet s versatility and the skill of the pilots involved Despite its F for fighter designation the F 105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed long range and below the radar altitudes However when the Vietnam War began it also emerged as USAF s best available tactical bomber for a limited conventional war as well Extensively targeted by MiG 17s and MiG 21s the F 105 pilots developed innovative tactics that allowed them to compete in air to air duels with their smaller more manoeuvrable enemies Illustrated throughout with extensive photographs detailing weapon loads internal features and action shots of actual engagements this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack escort fighter and radar monitoring elements within strike formations

*MiG-17/19 Aces of the Vietnam War* István Toperczer, 2016-10-20 At the beginning of the Vietnam War the Vietnam People s Air Force VPAF were equipped with slow old Korean War generation fighters a combination of MiG 17s and MiG 19s types that should have offered little opposition to the cutting edge fighter bombers such as the F 4 Phantom II F 105 Thunderchief and the F 8 Crusader Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965 the inexperienced pilots of the VPAF were able to shatter the illusion of US air superiority Taking advantage of their jet s unequalled low speed maneuverability small size and powerful cannon armament they were able to take the fight to their missile guided opponents with a number of Vietnamese pilots racking up ace scores Packed with information previously unavailable in the west and only recently released from archives in Vietnam this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam

*MiG-17 and MiG-19 Units of the Vietnam War* István Toperczer, 2012-11-20 A detailed history of the MiG 17 and MiG 19 units of the Vietnamese People s Air Force packed with first hand accounts and colour profiles The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War the Vietnamese Peoples Air Force VPAF quickly grew from an ill organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam As this book explores flying Soviet fighters like the MiG 17 and 19 the VPAF produced over a dozen aces whilst the Americans managed just two pilots and three navigators in the same period

*F-105 Thunderchief* Dennis R. Jenkins, 2000 Meeting demand for small thermonuclear weaponry capable of penetrating Soviet defences the F 105 evolved through many generations of prototype This work includes technical detail balanced by facts and insider stories missions production avionics development the people and the works

*MiG-21 Aces of the Vietnam War* István Toperczer, 2017-09-21 Having learned their trade on the subsonic MiG 17 pilots of the Vietnamese People s Air Force VPAF received their first examples of the legendary MiG 21 supersonic

fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the US Air Force US Navy and US Marine Corps crews striking at targets deep in communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills Indeed by the time the last US aircraft a B 52 was claimed by the VPAF on 28 December 1972 no fewer than 13 pilots had become aces flying the MiG 21 Fully illustrated with wartime photographs and detailed colour artwork plates and including enthralling combat reports this book examines the many variants of the MiG 21 that fought in the conflict the schemes they wore and the pilots that flew them F-104 Starfighter Units in Combat

Peter E. Davies,2014-11-20 This title covers the technical characteristics of the F 104 Starfighter one of the most widely used and popular aircraft in history Although built in small numbers for the USAF the F 104C fought and survived for almost three years in Vietnam There it was engaged in some of the war s most famous battles including the legendary operation Bolo where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter This small tough and very fast fighter dubbed The Missile with a Man in It was called upon to do things it was not specifically designed for and did them admirably Featuring illustrations and photographs detailing the variety of nose paint schemes and weapons configurations this comprehensive appraisal of the F 104 Starfighter is ideal for modelling and aviation enthusiasts alike USAF F-4 and F-105

**Thunderchief Units of the Vietnam War** Peter E. Davies,2012-11-20 The combat history of the F 105 Thunderchief units during the Vietnam War detailing the strengths and weaknesses of the aircraft and the difficulties it faced during many months of dangerous combat Facing the most formidably concentrated air defences in history pilots of the F 105D flew against North Vietnamese targets day after day during the 43 months of Operation Rolling Thunder Despite its limited maneuverability and the lack of self sealing fuel tanks which made it susceptible to combat damage the bombers shot down 27 MiG fighters in 1966 67 This book illustrates the importance of the Thunderchief in the Rolling Thunder campaign including the pioneering suppression of enemy air defences SEAD methods developed by the F 105 Wild Weasel crews Discussing the aircraft s strengths and weaknesses and using first hand narratives Peter Davies captures the essence of

Davies, 2019-07-25 The F 105D Thunderchief was originally designed as a low altitude nuclear strike aircraft but the outbreak of the Vietnam War led to it being used instead as the USAF's primary conventional striker against the exceptionally well defended targets in North Vietnam and Laos F 105 crews conducted long distance missions from bases in Thailand refuelling in flight several times and carrying heavy external bombloads The MiG 17 was the lightweight highly manoeuvrable defending fighter it encountered most often in 1965-68 during Operation Rolling Thunder A development of the MiG 15 which shocked UN forces during the Korean War its emphasis was on simplicity and ease of maintenance in potentially primitive conditions Fully illustrated with stunning artwork this book shows how these two aircraft totally different in design and purpose fought in a series of duels that cost both sides dearly *The Illustrated History of the Vietnam War* Brian Beckett, 1985 An illustrated documentary of the Vietnam War from the establishment of French rule to the secret operations in Laos and Cambodia and the fall of Saigon **Air War South Vietnam** Marshall Cavendish, 1988 **Viper Pilot** Dan Hampton, 2012-10-02 THE NEW YORK TIMES
