**The Wellness Sense** Om Swami,2015-08-04 Why do certain foods harm some people and help others How come the same weight loss program shows different results on different individuals And why do some people fall sick more often than others Answers to these questions and many more lie in Ayurveda where your body is not just looked upon a holder of flesh and bones but the finest vehicle of experiencing all pleasures and sorrows In Ayurveda as in yoga and tantra the health of an individual is not just the state of his physical body but an aggregate of the body senses mind and soul Your body is a sacred space it is the seat of your consciousness The Sanskrit word for health is svasthya it means self dependence or a sound state of the body and mind If examined further it means your natural state sva means natural and sthya means state or place Ayurveda aims to restore your natural state balance so you may be free of mental and physical afflictions More often than not and certainly in adults most physical disorders are the result of a repressed and bruised consciousness Mental afflictions create diseases in the physical body and physical diseases in turn disturb the state of mind You can treat the disease in the physical body but that s merely treating the symptom It is not the permanent solution The modern system of medicine is mostly symptom driven If I have a headache it ll tell me to take a pain killer Ayurveda does not believe in treating the symptoms Its advocates understanding the patient and treating the cause of the symptom and not the symptom itself In order to do that the ancient scriptures took a far more holistic approach to health by combining our lifestyle with our natural tendencies which vary from one person to another In other words it understood that one man s medicine could be another man s poison Expounding on the esoteric aspects of the ancient wisdom in simple terms this book shows you how to take care of yourself better and how to lead a healthier life in our present world a world where we have all
