## **Tilt Shifting Your Strategy From Products To Customers:**

**Tilt** Niraj,2013-10-15 Shift your strategy downstream Why do your customers buy from you rather than from your competitors If you think the answer is your superior products think again Products are important of course For decades businesses sought competitive advantage almost exclusively in activities related to new product creation They won by building bigger factories by finding cheaper raw materials or labor or by coming up with more efficient ways to move and store inventory and by inventing exciting new products that competitors could not replicate But these sources of competitive advantage are being irreversibly leveled by globalization and technology Today competitors can rapidly decipher and deploy the recipe for your product s secret sauce and use it against you Upstream product related advantages are rapidly eroding This does not mean that competitive advantage is a thing of the past Rather its center has shifted As marketing professor Niraj Dawar compellingly argues advantage is now found downstream where companies interact with customers in the marketplace Tilt will help you grasp the global nature of this downstream shift and its profound implications for your strategy and your organization With vivid examples from around the world ranging across industries and sectors Dawar shows how companies are reorienting their strategies around customer interactions to create and capture unique value And he demonstrates how unlike product related advantage this value is cumulative continuously building over time In an increasingly customer centered world marketplace let Tilt serve as your guide to shifting your strategy downstream and achieving enduring competitive advantage
