Time And Freedom Studies In Phenomenology And Existential Philosophy:

Time and Freedom Christophe Bouton, 2014-10-30 Christophe Bouton's *Time and Freedom* addresses the problem of the relationship between time and freedom as a matter of practical philosophy examining how the individual lives time and how her freedom is effective in time. Bouton first charts the history of modern philosophy's reengagement with the Aristotelian debate about future contingents beginning with Leibniz. While Kant, Husserl, and their followers would engage time through theories of knowledge, Schopenhauer, Schelling, Kierkegaard, and later Heidegger, Sartre, and Levinas applied a phenomenological and existential methodology to time but faced a problem of the temporality of human freedom. Bouton's is the first major work of its kind since Bergson's *Time and Free Will* 1889 and Bouton's *mystery of the future* in which the individual has freedom within the shifting bounds dictated by time charts a new direction
