A portrait of Alfred von Tirpitz, a man with a very full, bushy grey beard and mustache, wearing a naval officer's uniform with a high standing collar and a braided insignia on the shoulder. He is looking slightly to the left.

## **Tirpitz And The Imperial German Navy:**

Tirpitz Patrick J. Kelly, 2011-05-03 A first rate biography of this grand admiral who is better known for his political skills than his naval ones US Naval Institute Proceedings Grand Admiral Alfred von Tirpitz 1849 1930 was the principal force behind the rise of the German Imperial Navy prior to World War I challenging Great Britain's command of the seas As State Secretary of the Imperial Naval Office from 1897 to 1916 Tirpitz wielded great power and influence over the national agenda during that crucial period By the time he had risen to high office Tirpitz was well equipped to use his position as a platform from which to dominate German defense policy Though he was cool to the potential of the U boat he enthusiastically supported a torpedo boat branch of the navy and began an ambitious building program for battleships and battle cruisers Based on exhaustive archival research including new material from family papers Tirpitz and the Imperial German Navy is the first extended study in English of this germinal figure in the growth of the modern navy Well written and based on new sources allows the reader deep insights into the life of a man who played a very important role at the turn of the last century and who like almost nobody else shaped German policy International Journal of Maritime History An invaluable reference work on Tirpitz the Imperial German Navy and on politics in Wilhelmine Germany The Northern Mariner

### **German Naval Strategy, 1856-1888**

David H. Olivier, 2004 This book is a comparative study of the evolution of the German navy in the second half of the nineteenth century It examines the development of strategy especially commerce raiding in comparison to what other navies were doing in this era of rapid technological change It is not an insular history merely listing ship rosters or specific events it is a history of the German navy in relation to its potential foes It is also a look at a new military institution involved in an inter-service rivalry for funds technology and manpower with the prestigious and well established army

Michael Epkenhans, 2008 Alfred von Tirpitz 1849 1930 who joined the Prussian Navy in 1865 as a midshipman was chiefly responsible for rapidly developing and enlarging the German Navy especially the High Seas Fleet from 1897 until the years immediately prior to the First World War Epkenhans uses newly discovered documents to provide a fresh treatment of this important naval leader In 1897 Tirpitz became the Secretary of State of the Imperial Navy Department In four major building acts of 1898 1900 1908 and 1912 and in working closely with Kaiser Wilhelm II Tirpitz expanded the Imperial Navy from a small coastal force into a major blue water navy Great Britain reacting with alarm to this challenge to its overseas trade and naval supremacy accelerated the naval arms race by launching a revolutionary type of battleship the Dreadnought in 1906 and entering into strategic alliances with France and Russia By the start of the First World War in 1914 the British Royal Navy still held a sizable advantage in capital ships over Germany so that only one notable fleet action Jutland in 1916 took place during the war Tirpitz who had become the German Navy commander with the outbreak of the war thereafter became a staunch advocate of unrestricted submarine warfare This policy did not differentiate between neutral and belligerent

shipping and proved so controversial with the neutral United States that Germany was forced to retract it albeit only temporarily In the meantime Tirpitz tendered his resignation to the Kaiser who surprisingly accepted it Tirpitz remained a minor figure thereafter later serving the right wing Fatherland Party as a deputy in the Reichstag     **'Luxury' Fleet: (RLE The First World War)** Holger Herwig,2014-04-24 Originally published in 1980 Luxury Fleet the phrase was Winston Churchill's was the first history of the Imperial German navy from 1888 to 1918 After tracing the historical background to German naval ambitions the first two sections of the book analyse Admiral Tirpitz's programme of building a battle fleet strong enough to engage the Royal Navy in the North Sea The author shows the fleet in its European setting and describes the warships and the attitudes of the officer corps and seamen The final section of the book discusses the tactical deployment of the German fleet during the First World War both in home waters and overseas and it weighs the balance between those who supported fleet actions in preference to those who favoured cruiser and submarine warfare     *"Luxury" Fleet* Holger H. Herwig,1987 Luxury Fleet the phrase was Winston Churchill's is the first history of the Imperial German Navy from 1888 to 1918 After tracing the historical background to German naval ambitions the first two sections of the book analyze Admiral Tirpitz's program of building a battle fleet strong enough to engage the Royal Navy in the North Sea Professor Herwig shows that fleet as a force that would complement the most efficient army in Europe and describes the warships that were built and the attitudes of the officer corps and men The last section of the book considers the tactical deployment of the German fleet during the First World War both in home waters and overseas and it ends appropriately perhaps with the scuttling of the German fleet in Scapa Flow in 1919     **Architects of Continental Seapower** Jeremy Stocker,2020-10-01 This book describes and analyses two iconic figures in twentieth century naval history the German Admiral Alfred von Tirpitz and the Russian Admiral Sergei Gorshkov It examines the men what they thought and wrote about seapower the fleets they created and the strategic consequences of what they did More broadly it draws on the respective histories of the post 1897 Imperial German Navy and the post 1956 Soviet Navy to examine the continental bid for large scale seapower The work argues that both individuals built navies that did not and could not fulfil the objectives for which they were created Drawing on the legacies of both men the book also develops some wider ideas about the creation of large navies by continental states with cautionary lessons for today's emerging powers India and China Both admirals have received book length biographies but this is the first attempt at a comparative study and the first to draw broader strategic lessons from their respective attempts as continental navalists to challenge maritime states This book will be of much interest to students of naval history strategic studies and International Relations     **Tides of Fortune** Zack Cooper,2025-02-25 An ambitious look at how the twentieth century's great powers devised their military strategies and what their implications mean for military competition between the United States and China How will the United States and China evolve militarily in the years ahead Many experts believe the answer to this question is largely unknowable But Zack Cooper argues that the American and Chinese militaries are

following a well trodden path For centuries the world's most powerful militaries have adhered to a remarkably consistent pattern of behavior determined largely by their leaders' perceptions of relative power shifts By uncovering these trends this book places the evolving military competition between the United States and China in historical context Drawing on a decade of research and on his experience at the White House and the Pentagon Cooper outlines a novel explanation for how militaries change as they rise and decline Tides of Fortune examines the paths of six great powers of the twentieth century tracking how national leaders adjusted their defense objectives strategies and investments in response to perceived shifts in relative power All these militaries followed a common pattern and their experiences shed new light on both China's recent military modernization and America's potential responses

**Building the Kaiser's Navy** Gary E. Weir,1992 His considerable talents as a politician shipbuilder strategist propagandist and manager were to a great degree responsible for the High Seas Fleet encountered by the Royal Navy at Jutland Ironically von Tirpitz never commanded the navy he built Weir does not fail to delineate the shortcomings of his naval system which was responsible for the fact that those in charge of the fleet's operations played little part in its creation Von Tirpitz's system also resulted in a disregard of the significance of U boat potential and a lack of geographic strategic and operational considerations Nevertheless his profound influence in the navy persisted through the

Weimar Republic and into the Third Reich in the policies of Admiral Erich Raeder veteran of Jutland **The Imperial German Navy, 1910-1914** James Edward Sutton, 1953 How States Think John J. Mearsheimer, Sebastian Rosato, 2023-01-01 A groundbreaking examination of a central question in international relations Do states act rationally To understand world politics you need to understand how states think Are states rational Much of international relations theory assumes that they are But many scholars believe that political leaders rarely act rationally The issue is crucial for both the study and practice of international politics for only if states are rational can scholars and policymakers understand and predict their behavior John J Mearsheimer and Sebastian Rosato argue that rational decisions in international politics rest on credible theories about how the world works and emerge from deliberative decision making processes Using these criteria they conclude that most states are rational most of the time even if they are not always successful Mearsheimer and Rosato make the case for their position examining whether past and present world leaders including George W Bush and Vladimir Putin have acted rationally in the context of momentous historical events including both world wars the Cold War and the post Cold War era By examining this fundamental concept in a novel and comprehensive manner Mearsheimer and Rosato show how leaders think and how to make policy for dealing with other states *Reader's Guide to Military History* Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations *The German Fleet* Archibald Hurd, In the history of nations there is probably no chapter more fascinating and arresting than that which records the rise and fall and subsequent resurrection of German sea power In our insular pride conscious of our glorious naval heritage we are apt to forget that Germany had a maritime past and that long before the German Empire existed the German people attained pre eminence in oversea commerce and created for its protection fleets which exercised commanding influence in northern waters It is an error therefore to regard Germany as an up start naval Power The creation of her modern navy represented the revival of ancient hopes and aspirations To those ambitions in their unaggressive form her neighbours would have taken little exception Germany had become a great commercial Power with colonies overseas and it was natural that she should desire to possess a navy corresponding to her growing maritime interests and the place which she had already won for herself in the sun The more closely the history of German sea power is studied the more apparent it must become that it was not so much Germany's Navy Acts as the propaganda by which they were supported and the new and aggressive spirit which her naval organisation brought into maritime affairs that caused uneasiness throughout the world and eventually created that feeling of antagonism which found expression after the opening

of war in August 1914 In the early part of 1913 I wrote in collaboration with a friend who possessed intimate knowledge of the foundations and the strength of the German Empire a history of the German naval movement particular emphasis being laid on its economic basis In the preparation of the present volume I have drawn upon this former work It has been impossible however in the necessarily limited compass of one of the Daily Telegraph War Books to deal with the economic basis upon which the German Navy has been created I believe that the chapters in German Sea Power with reference to this aspect of German progress for which my collaborator was responsible and of which therefore I can speak without reserve still constitute a unique presentation of the condition of Germany on the eve of the outbreak of war Much misconception exists as to the staying power of Germany The German Empire as an economic unit is not of mushroom growth Those readers who are sufficiently interested in the subject of the basis of German vitality will realise vividly by reference to German Sea Power the deep and well laid foundations upon which not only the German Navy but the German Empire rest Whether this history should be regarded as the romance of the German Navy or the tragedy of the German Navy must for the present remain an open question In everyday life many romances culminate in tragedy and the course of events in the present war suggest that the time may be at hand when the German people will realise the series of errors committed by their rulers in the upbuilding of German sea power Within the past fifteen years it is calculated that about 300 000 000 has been spent in the maintenance and expansion of the German Fleet the improvement of its bases and the enlargement of the Kiel Canal Much of this money has been raised by loans Those loans are still unpaid it was believed by a large section of the German people that Great Britain hampered by party politics and effete in all warlike pursuits would after defeat repay them That hope must now be dead To be continue in this ebook      **Harper's Pictorial Library of the World War** Albert Bushnell Hart,1920
