A TI-nspire CAS Touchpad calculator that returns this message at start up has either a corrupted operating system or no operating system installed.

In most cases the documents folder is unaffected and the device will still be recognised by TI-nspire Computer Link or the TI-nspire computer software. If you wish to back up your calculator files this should be done before following these steps by copying the entire documents folder to the computer.

Step 1 – Maintenance Menu

The maintenance menu provides an inbuilt method of deleting remnants of an incomplete or corrupted operating system. To access the maintenance menu the calculator must be turned off completely. Remove batteries

- Detach the keypad and remove two batteries, one from each of the two slots.
- Wait for 5 seconds before reinserting the batteries.
- Replace the keypad then press and hold: [DOC] + [Enter] + [EE] while turning the calculator on. **Keep holding the three keys until the maintenance menu is displayed.**

Reset button

- Press and hold: [DOC] + [Enter] + [EE] and press the reset button on the reverse side of the calculator. (You may need a friend to help you.) **Keep holding the three keys until the maintenance menu is displayed.**

Technology-Assisted Guided Discovery to Support Learning Lisa Göbel, 2021-02-23

Technology is becoming more and more integrated in mathematics teaching and the use of technology is explicitly demanded by the curricula. Technology can be for example integrated while conceptualizing parameters of quadratic functions. In this thesis three technical visualizations classic function plotter drag mode and sliders for the manipulation of parameters of quadratic functions shall be compared with an access without the possibility of technical visualization. For this purpose a Guided Discovery environment was developed which was conducted in an intervention study with 14 classes of grade 9 N 383. Different strengths and weaknesses of the individual visualizations in favor of the dynamic visualizations by drag mode and slider are shown. Also different potentials and constraints of the use of technology are visible for example the students use

the technology to test their own hypotheses that were generated through the use of technology The author Lisa G bel completed her dissertation as a research assistant under Prof Dr B rbel Barzel in the Mathematics Education department at the University of Duisburg Essen Her interests include functional thinking and the use of technology in mathematics teaching
