Warner Interview Questions And Answers:

It's Not TV Felix Gillette, John Koblin, 2022-11-01 A read so riveting it's not hard to imagine watching it unfold on Sunday nights. The Associated Press An incisive account that is more than a rosy victory lap for one of TV's most influential channels. Eric Deggans NPR's Books We Love It's Not TV proves to be a lively companion to all these shows. Andrew O'Hagan The New York Review of Books The inside story of HBO the start up company that reinvented television by two veteran media reporters. HBO changed how stories could be told on TV The Sopranos Sex and the City The Wire Game of Thrones The network's meteoric rise heralded the second golden age of television with serialized shows that examined and reflected American anxieties fears and secret passions through complicated characters who were flawed and often unlikable. HBO's own behind the scenes story is as complex compelling and innovative as the dramas the network created driven by unorthodox executives who pushed the boundaries of what viewers understood as television at the turn of the century. Originally conceived by a small upstart group of entrepreneurs to bring Hollywood movies into living rooms across America the scrappy network grew into one of the most influential and respected players in Hollywood. It's Not TV is the deeply reported definitive story of one of America's most daring and popular cultural institutions laying bare HBO's growth dominance and vulnerability within the capricious media landscape over the past fifty years. Through the visionary executives showrunners and producers who shaped HBO seasoned journalists Gillette and Koblin bring to life a dynamic cast of characters who drove the company's creative innovation in astonishing ways outmaneuvering copycat competitors taming Hollywood studios transforming 1980s comedians and athletes like Chris Rock and Mike Tyson into superstars and in the late 1990s and 2000s elevating the commercial free serialized drama to a revered art form. But in the midst of all its success HBO was also defined by misbehaving executives internal power struggles and a few crucial miscalculations. As data driven models like Netflix have taken over streaming HBO's artful instinctual and humanistic approach to storytelling is in jeopardy. Taking readers into the boardrooms and behind the camera It's Not TV tells the surprising fascinating story of HBO's ascent its groundbreaking influence on American business technology and popular culture and its increasingly precarious position in the very market it created.

Implementing an Inclusive Staffing Model for Today's Reference Services Julia K. Nims, Paula Storm, Robert Stevens, 2013-11-26 Reference service remains a core function of modern libraries. However how and where we provide assistance has evolved with changing technologies and the shifting habits and preferences of our users. One way libraries can provide the on demand in person assistance while managing and developing new services and resources that will benefit current and future users is to reconsider how their reference points and services are staffed and adopt a staff based reference model. The authors staff members at Eastern Michigan University chose to address this by implementing an inclusive reference model in which staff and student assistants are trained to answer certain levels of reference questions while working at the reference desk and at other service points. The result was that librarians became more available to work

with students who needed in depth assistance and users were able to get simple questions answered throughout the library. Similar training for all staff and student assistants who work in the library results in better service more accurate answers and improved interdepartmental communication. In *Implementing an Inclusive Staffing Model for Today's Reference Services* they describe step by step how to transition from the traditional librarian staffed reference desk to an inclusive reference model where non MLS personnel are equipped and empowered to answer reference questions wherever these questions might be asked. Users ask questions of staff at all service points not just at the Reference Desk. It is vitally important that those who work at circulation, periodicals, maps, archives and other public service points be trained in how to answer certain reference questions. When this is accomplished users who have simple questions will not have to make useless treks to the Reference Desk. Topics covered include Recognizing that nearly all staff answer reference questions but few are trained to do so, documenting the necessity for a change in reference model, gaining buy in from all interested parties, librarians, non MLS staff and administrators, determining the optimal staffing level, creating training materials and schedules, monitoring the quality of reference service, supervising staff, evaluating the new model using multiple methods. Additionally each chapter contains practical resources such as checklists, forms and sample materials and other usable features to support readers as they implement the inclusive reference model. The book describes in detail the process of transforming traditional reference into a model that transcends departmental and job title boundaries, is focused on the user and allows librarians to better utilize their time and talents and include non professional staff in their reference services.
