

GUIDED WAVE

ADVANCED CORROSION INSPECTION TECHNOLOGY FOR PIPELINES AND PROCESS PIPING

Are you sure about the condition of your piping? What about the buried sections or the insulated parts? It is not easy to assess their condition in an effective way. The piping may be located many metres above the ground where they cross roadways or other pipe racks and what do you know after some local spot measurements?

As process piping is a vital element of your facilities good understanding of their reliability is preventing unexpected shutdowns or delays during maintenance periods. Guided Wave technology is a relatively new inspection technology with very big advantages above any other spot measurement.

The Guided Wave technology screens 100% of the volume of the piping inspected for metal loss features such as corrosion and erosion. The piping can be in operation, insulated and even be buried. Guided Wave technology will supply more data than we ever had to found decisions on further inspection and even replacement.
