## We The People Consenting To A Deeper Democracy:

Sociocracy ensures the rights of life, liberty and the pursuit of happiness to everyone and in the process makes businesses more profitable and non profit organizations more effective. **We the People** John Buck,Sharon Villines,2017-09 Sociocracy uses cybernetics and the study of biological systems to design organizations that are powerful self organizing and self correcting. *Accelerating Social Change* Luigi Morelli,2021-11-03 Social change is more than a political statement or demand. It is a moral and spiritual imperative. If this is so then it involves the whole human being in the way he perceives and thinks feels and relates and acts on and impacts the world. This work gathers the threads of pioneers and visionaries in various aspects of social and cultural renewal. Paradigms of include and transcend offer us paths along which the personal and the global are intimately intertwined. Through established pathways and processes we can experiment with new ways of being as we impact our immediate world. Practically speaking this book explores three avenues to change. At a first level we can start to recognize that society is built around three poles. Besides the public and private sectors civil society has emerged to play a crucial role and alter dualistic thinking. If we think beyond capitalism and socialism and all their variations and combinations new unthought of frontiers and possibilities emerge. It is possible to expand our practice of democracy beyond the majority minority dynamics to the inclusion of all stakeholders. A new art and science of civic collaboration can break the gridlocks of polarization and opposition. We can engage in a new area of honest energetic collaboration moving beyond weak compromise through an array of social tools that have grown in the last forty to fifty years and have now reached full maturity. Lastly we can expand organizational and social forms in ways that completely break away from the past. We can reconcile both entrepreneurial and participatory paradigms and transcend top down or bottom up models in ways that our intellect alone cannot fathom. Paradigms offer generous visions but are also exacting masters. The new revolution will request as much of ourselves as we will request of the world. **The New Leadership Paradigm** Richard Barrett,2011-01-09 New from Richard Barrett. The New Leadership Paradigm is more than a leadership text book 530 pages it is a state of the art learning system for 21st century leaders. The book is in six parts. **We Built a Village** Diane Rothbard Margolis,2022-08-23 Describes the development of one of the first cohousing communities in the US offering a social understanding of its commons Cohousing a form of communal living that clusters around shared common space began about a half century ago in Denmark We Built a Village describes the process of planning and building of an early cohousing community in Cambridge Massachusetts and the way the people involved simultaneously built their homes and their social structure As both a memoir and a sociological analysis that probes the differences between commons and markets it is unique among books about cohousing When this group of people began in the late 1990s to construct their cohousing community they set in motion a counterpoint between the physical spaces and the social configurations that would guide their lives together even up to creative responses to the recent pandemic

**Ecovillages** Karen T. Litfin,2014-01-15 In a world of dwindling natural resources and mounting environmental crisis who is devising ways of living that will work for the long haul And how can we as individuals make a difference To answer these fundamental questions Professor Karen Litfin embarked upon a journey to many of the world's ecovillages intentional communities at the cutting edge of sustainable living From rural to urban high tech to low tech spiritual to secular she discovered an under the radar global movement making positive and radical changes from the ground up In this inspiring and insightful book Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows ecology economics community and consciousness or E2C2 Whether we live in an ecovillage or a city she contends we must incorporate these four key elements if we wish to harmonize our lives with our home planet Not only is another world possible it is already being born in small pockets the world over These micro societies however are small and time is short Fortunately as Litfin persuasively argues their successes can be applied to existing social structures from the local to the global scale providing sustainable ways of living for generations to come You can learn more about Karen's experiences on the Ecovillages website <http://ecovillagebook.org>

**Legal Secrets** Kim Lane Scheppelle,1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppelle answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppelle also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality

**Methodist Magazine and Quarterly Review** ,1919 Papers and Proceedings of the Annual Meeting American Economic Association,1944 **University of Vermont Notes** ,1917 **Democracy's Deep Roots** Steffen Schneider,2010-04-09

Does the democratic nation state remain a legitimate regime form in the current age of globalization Sceptical assessments of the nation state's legitimacy and outright crisis diagnoses prevail in the academic literature especially in the contributions of public opinion researchers Democracy's Deep Roots uses a novel text analytical approach to probe this topical question Drawing on a comparative study of legitimization discourses in the quality press of four Western democracies Switzerland Germany Britain and the United States it shows that the levels and democratic foundations of public support for the nation state and its core institutions are surprisingly robust There is little evidence for the fully fledged erosion of legitimacy or for a transformation of its foundations in the public spheres of Western democracies The book also identifies a number of discursive mechanisms that explain this finding and suggests an analytical frame work for future research into the communicative dimension of legitimization processes Book Jacket
