Weak Signals For Strategic Intelligence Anticipation Tool For Managers:

Weak Signals for Strategic Intelligence Humbert Lesca, Nicolas Lesca, 2013-01-09 The expression We did not see it coming has often been heard in recent years from decision makers at the highest levels of responsibility in the private and public sectors Yet there were actually early warning signals but they were often ignored or not used due to a lack of appropriate methodology To avoid such blind spots this book provides answers to the question how to anticipate The concept of a weak signal is at the heart of the proposed methods After presenting examples of this concept the authors provide original and validated answers to questions of feasibility How to recognize a weak signal How to exploit it Numerous applications are presented

Strategic Intelligence for the Future 1 Henri Dou, Alain Juillet, Philippe Clerc, 2019-04-30 Information in all its forms is at the heart of the economic intelligence process It is also a powerful vector of innovation and more than ever a balance between economic and societal forces Strategic Intelligence for the Future 1 analyzes the need for the French economic intelligence to mutate in order to develop the economy strengthen social cohesion and protect vital interests This mutation requires a change of attitudes and a new way of thinking widely open to global change and new technologies The focus of the French economic intelligence on conventional objectives such as business and the economy does not allow for the integration of its multiple possible fields and thus its global nature The strategy foresight and temporal dynamics necessary to the understanding of the world and the new balance of power and control of complex situations have thus increased the time needed to put this in place Both theoretical and practical this book provides a basis from which to develop enhanced economic intelligence leading to the implementation of global security

Strategic Intelligence for the Future 2 Henri Dou, Alain Juillet, Philippe Clerc, 2019-04-30 Information in all its forms is at the heart of the economic intelligence process It is also a powerful vector of innovation and more than ever a balance between economic and societal forces That is why a large part of Strategic Intelligence for the Future 2 analyzes the various aspects of information from traditional processing and research to the psychological and epigenetic aspects of its development This leads to a new vision of its integration into organizations In addition new technologies offer extensive access to information including social networks which are critically analyzed here In a complex world where geopolitics and the new concept of information warfare are becoming increasingly important it becomes imperative to better apprehend and understand our environment in order to develop critical thinking that will reinforce the different global aspects of security in economic intelligence
