## **Web Journalism Practice And Promise Of A New Medium:**

**Web Journalism** James Glen Stovall, 2004 Journalism on the Web explores the current practices and future possibilities of Web journalism and examines the characteristics of the Web that distinguish it from traditional media. The author guides students through discussion of the traditional practices of journalism such as reporting, editing, photojournalism, and design while showing how the distinguishing features of the Web—capacity, immediacy, flexibility, permanency, and interactivity—offer new storytelling possibilities. The traditional principles of journalism, particularly journalistic writing that emphasizes accuracy, clarity, precision, and efficiency, are emphasized throughout the text. Features: The first three chapters offer an in-depth examination of the Web as an individual news medium, taking students beyond the idea that Web news is simply a newspaper on screen. An inside look at MSNBC provides students with an idea of what it's like to be inside a 24-hour Web news organization. Ch 13: Three chapters on lateral thinking ask students to think beyond the traditional narrative storytelling forms of the inverted pyramid and present a variety of forms and structures to present information. 4, 5, 6: Cool Ideas sidebars located throughout the book offer short descriptions of innovative ideas of Web journalism to stimulate creative thinking. Web site references at the end of each chapter provide professors with the best sites available for keeping up with advances in Web journalism.

**The Web as History** Niels Brügger, Ralph Schroeder, 2017-03-06 The World Wide Web has now been in use for more than 20 years. From early browsers to today's principal source of information, entertainment, and much else, the Web is an integral part of our daily lives to the extent that some people believe if it's not online, it doesn't exist. While this statement is not entirely true, it is becoming increasingly accurate and reflects the Web's role as an indispensable treasure trove. It is curious, therefore, that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society, despite making good use of letters, novels, newspapers, radio, and television programmes and other pre-digital artefacts. This volume argues that now is the time to ask what we have learnt from the Web so far. The 12 chapters explore this topic from a number of interdisciplinary angles through histories of national web spaces and case studies of different government and media domains, as well as an introduction that provides an overview of this exciting new area of research.

acknowledge that participation is a complex and contested notion covering a wide variety of meanings and practices that are converging into a hybrid of technologies genres and formats At the same time prudence is required as many of the empowering and transformative opportunities cover up a multitude of restrictions that deal with muting voices appropriations techniques of surveillance inequalities and exclusions This volume thus provides its readership with a set of analyses that reconcile the appreciation for the analogue and digital empowerment and emancipation with the critical analysis of their boundaries Participation and Media Production is the result of the intellectual work of the participants of the 2007 San Francisco Conference of the International Communication Association ICA 2007 2006-02 2007 2007-06 1976 Aslib Proceedings ,2008 **American Journalism Review** ,2000
