IT Security Policy Management Usage Patterns Using IBM Tivoli Security Policy Manager Axel Buecker,Scott Andrews,Craig Forster,Nicholas Harlow,Ming Lu,Sridhar Muppidi,Trevor Norvill,Philip Nye,Günter Waller,Eric T. White,IBM Redbooks,2011-10-26 In a growing number of organizations policies are the key mechanism by which the capabilities and requirements of services are expressed and made available to other entities The goals established and driven by the business need to be consistently implemented managed and enforced by the service oriented infrastructure expressing these goals as policy and effectively managing this policy is

fundamental to the success of any IT and application transformation First a flexible policy management framework must be in place to achieve alignment with business goals and consistent security implementation Second common reusable security services are foundational building blocks for SOA environments providing the ability to secure data and applications Consistent IT Security Services that can be used by different components of an SOA run time are required Point solutions are not scalable and cannot capture and express enterprise wide policy to ensure consistency and compliance In this IBM Redbooks publication we discuss an IBM Security policy management solution which is composed of both policy management and enforcement using IT security services We discuss how this standards based unified policy management and enforcement solution can address authentication identity propagation and authorization requirements and thereby help organizations demonstrate compliance secure their services and minimize the risk of data loss This book is a valuable resource for security officers consultants and architects who want to understand and implement a centralized security policy management and entitlement solution
