[Grow Your Wealth Using Weekly Options Trading](#) Jon Schiller, Dr, PhD, Jon Schiller, 2011-01-22 The behavior of the US and World Stock Markets is caused by Fear of the Big Traders on days when the market suffers a loss greater than 2 sigma by Hope when the

market enjoys an increase greater than 2 sigma and changes very little when the Big Traders are Cautious during a trading day To Cause Wealth to Grow we must use Options trading strategies that make profits and limit or avoid losses when the market makes sudden erratic movements as well My software program SelfAdapJonWeeklyCndrs has evolved during the last 25 years of options trading by your author Dr Jon Schiller Starting with a London Broker Trading FTSE 100 options placing orders by FAX ending with TradeKing Broker placing orders using their trading Automated Website I modified my software during my 25 years of trading to change as the market changed I started using Naked Index Option spreads which requires 50K in your options account I modified the strategy to use Covered Index Option Spreads which capital in your options account based on the number of spreads and the strike price spacing I tried WWI triggered Debit Spreads I switched to Condors simultaneous Call and Put 2 sigma spreads then a few years ago when Weekly Options became available from the CBOE I switched to 2 sigma weekly options using Condors as the best way to make Wealth Grow the best weekly options to consider for trading By sorting thru the indices and stocks tracked by my old software I found there were several weekly options that were worth tracking in today s market The new software program is SelfAdapJonWeeklyCndrs which Uses the Strategies Tools described in this book The Excel Based Software uses CBOE quotes for the Options Data and Computes the 2 sigma values for the Stocks Indices tracked in the software Presents the Option Iron Condors for the same stocks indices The main option strategy is to use Weekly Options which become available with market open on Thursday for expiration on Friday a week and one day after the Options become available The Neural Network Signal Indicator using 6 Signal Indicators to Compute the Market Trends to Show when the market is probable to change direction Every 3rd Friday of each month the Monthly options expire Therefore on the second Friday of the month there is only a week left in the trading month so all stock options become weekly options So you may select the best of all the stocks for the weekly Condor to open on the Friday or Monday before the 3rd Friday I should point out that almost every week the SPY condors become best using %Return on Margin as the metric I use TradeKing as a broker for two reasons Their commissions are the lowest of the brokers I know about Their website is automated so placing the Condor or other Type Option orders is easy to do Just select the Strategy to Use the automated website will appear and enter the Parameters for the Option If you get your Capital to grow above 50 000 some brokers will allow you place Naked Spread orders in which you sell the 2 sigma Call and 2 sigma Put for a spread With TradeKing you must place a Pseudo Naked Spread a strategy I will describe in Chapter 5

**Weekly Options for Monthly Income** Jon Schiller, Ph.d., 2015-10-06 Weekly Index Options became available on the Chicago Board of Options Exchange in 2003 I have watched

this type of Options Trading evolve as more investors used weekly trading The trading software I have developed adapted to the weeklies evolution The software became simpler It uses SPX for the weekly options My principle strategy for trading Weekly Index Options uses 2 sigma Condors Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher Short Puts 2 standard deviations below the market and the Long Puts the next strike price lower This is called 2 Sig Iron Condors I have developed a tactic to make weekly profits in spite of the huge daily Up and Down movements in the SPX SelfAdapSPXweeklyVLTY is the name of my software which I use to generate monthly income The software described in this book uses only SPX for the options because I discovered that when I used other underlying stocks or indices such as Google and SPY SPX usually finished best This book describes how to use the TradeMonster real time SPX quotes for computing the 2 sig Condors used in my Software SelfAdapSPXweeklyVLTY Trade Monster s affiliate OptionsHouse can be used for Weekly Options trading if you have a minimum of 2 000 in the account I use 1 4 of the capital 500 for Margin to generate about 100 for the week or 400 for the Month In other words you get 90% return per month on 500 margin Remember the weekly in out trades should be no more than 2 per week to avoid being designated a day trader by your broker which requires a minimum of 25 000 in your account Double Your Money with Weekly Options Condors Jon Schiller, Jon Schiller Phd, 2010-09-22 The erratic behavior of the US and World Stock Markets required a change in trading strategy to avoid a loss of trading capital caused by enormous increases and decreases in the OEX and SPX during a trading day My software program SelfAdapDTN4 evolved during the last 10 years of tracking a great number of indices and many stocks It became very complex to use for trading In July 2010 I decided the complexity needed to be reduced for efficiency for the options trader I renovated my software to focus on the best weekly options to consider for trading By sorting thru the indices and stocks tracked by my old software I found there were several weekly options that were worth tracking in today s market The new software program is SelfAdapJonWeeklyCndrs which emphasizes a simpler user interface The size of the software was halved Appendix B is an abbreviated version of the manual for the software **Use Weekly Options to Increase Wealth** Jon Schiller, Ph.d., 2016-04-11 My principle strategy for trading Weekly Index Options uses 2 sigma Iron Condors Short Calls 2 standard deviations above the market and the Long Calls the next strike price higher Short Puts 2 standard deviations below the market and the Long Puts the next strike price lower This is called 2 Sig Iron Condors I have developed a procedure to make a Weekly Profit using Iron Condors My objective is to show you how to make a weekly profit of 150 week with 2 Condors As your capital increases with trading profits then you increase the number of Condors Then your weekly profit increases as the capital grows For example if the capital in your broker account permits 4 condors then the weekly profit would increase to 300 per week The weekly profit per Capital 150 2000 7 5% per week SelfAdapSPXweeklyVLTY is the name of my software which I use to generate weekly Profits This book describes how to use the TradeMonster real time SPX weekly option quotes My Software SelfAdapSPXweeklyVLTY computes the Strike Prices

used for the weekly option trades If you have another source for real time SPX weekly option quotes then that source can be used instead of the TradeMonster source You must have a minimum of 2000 in your broker account to do Weekly Iron Condor trading This book recommends starting with 2500 and presents a Capital Growth Model that shows that using the trading procedure herein this Initial Capital of 2500 could grow to 300 000 in 2 Years Weekly Index Options became available on the Chicago Board of Options Exchange in 2003 I have watched this type of Options Trading evolve as more investors used weekly trading I have changed my trading software to reflect this evolution I made my software simpler by limiting it to SPX for the weekly options trading

**Options Trading** T. R. Lawrence, 2023 The odds are 75% in your favor that you will profit from an options trade And it s even less risky and potentially more lucrative for the smaller investor if you trade weekly Do you want to have extra weekly spending cash to cover your day to day living expenses Would you like to earn passive income while you sleep Does the idea of a few minutes every other day adding up to consistent monetary returns sound good Options trading is so well regulated and organized these days that it takes a lot of the risk out of the process even if you are a total newbie to investing in any form And although it seems complicated at first glance the logic behind it is actually simple once you get the hang of it With proven strategies and clear explanations around how each level and element of how options trading works you can take your trading know how as far as you want with this practical guide As your skills grow you can keep coming back to it to level up or add more interest value to your trades The trading world can look complicated and overwhelming from the outside but weekly options are an easy no fuss way to start making money and grow your trading know how Even if you are not that great with numbers or complex strategies the easy to follow methods and explanations in this book will help guide you in the right direction

Intended for active traders and investors interested in making the most out of today s commodity ETF futures options and  
currencies markets this guide will make you a better trade in the search for greater profits Time is Money Kerry W.  
Given, Ph.D.,2015-02-18 The new book Time Is Money comes from Kerry Given the author of No Hype Options Trading and  
he discusses the concept of non directional trading If you have some experience with options trading you have probably  
heard the term delta neutral trading This is one of the buzzword phrases that has been used in marketing options trading  
education trading alert services and describing the strategies of hedge funds Delta neutral does sound exotic is this the  
trading secret I have been searching for But we will see clearly in this book that there is no secret to options trading Non  
directional trading is a lesser known term and may be considered a subset of delta neutral trading This book does an  
excellent job of distinguishing delta neutral trading from non directional trading These are not synonyms The trader may use  
a delta neutral strategy because he is predicting a sideways price pattern or price movement within a modest sized channel  
The delta neutral trade is just one choice among several options strategies If the trader is bullish he selects a bullish trade if  
he is bearish he selects a bearish trade And if his prediction is for a sideways price movement he selects a delta neutral trade  
This trader is using a delta neutral trading strategy as a directional trade it is based on the trader s prediction for the future  
price movement of the underlying stock or market index The directional trader has a specific interest with particular  
knowledge about an individual stock or index and a prediction for its future value Dr Given distinguishes non directional  
trading from delta neutral trading in one critically important way If one is trading non directionally he develops a series of  
rules for entry exit and adjustment of a delta neutral trading strategy and then enters and manages the position dictated by  
those rules month after month He has made no prediction of the future he just manages the position each day based on the  
market s price move that day The trader is no longer predicting the market s next move tomorrow the trader is reacting to  
what the market gives him today The non directional trader tries his best not to predict where the market is going tomorrow  
Instead he focuses on where the market is today and the actions his rules dictate He follows the rules This may seem like a  
fine distinction in semantics but give Time Is Money a try Focus on what the market is doing today and what your rules  
dictate Throw away your crystal ball Keywords Options Trading Strategies Delta Neutral Market Non Directional

**Weeks of Trading Weekly Options** Jon Schiller, Ph.d., 2011-05-01 My recently re-written at the beginning of 2011 software program SelfAdapINDXWeeklyCndrs evolved during the last 6 years of trading weekly options The evolution simplified the software user interface The NEW Weekly Condor Trading Software focuses on selecting the best 2SigMaxMin Condors from SPX OEX and SPY that is the one with the greatest potential weekly profit In a few short minutes the software allows the trader to choose the best Condor to trade for the greatest weekly profit I trade using software I have written using Microsoft's Excel Recently a reader has used my software on a Macintosh computer Everything seems to work the same except when copying the CBOE Quotes an extra blank row appears above the data One way to solve this problem for Mac computer owners is to add ONE to the formulas in the formula bar at the top of the screen in the cells referring to the NOW columns in the Condor sheets for the Call spread rows and then for the Put spread rows Example D57 D58 would have to be changed to D58 D59 The wild market swings such as caused the May 2010 Flash Crash have compelled the SEC to introduce required procedures to reduce these wild swings The 2SigMaxMin Condors help the trader to make weekly profits in spite of what volatility remains after the new SEC procedures Each trading week the trader should select on Friday the best weekly options Condor to open the next Monday which will expire the following Friday expiration The book explains what the trader must do if the short Call or short Put becomes ITM In The Money The trader should follow these procedures to minimize short term losses and make their trading profitable I modified my software during my 25 years of trading as the market changed I started using credit index OEX 100 monthly options spreads which required leaving the options spreads open from the third Friday to the third Friday of each month When Weekly options became available I found that was a safer way to trade than monthly options since your options positions were only available to be battered by the volatile market for a week at a time All of the big traders watch the same financial information on Internet When they see Good Info they buy causing the market to jump often more than 2 sigma When they see Bad News they all sell causing the market to plunge often more than 2 sigma One of the main goals of this book is to show ways I have discovered to avoid weekly options losses when these big Jumps and Drops occur It is easy to make good profits when the market behaves rationally It is easy to lose when the market acts irrationally The object is to generate an income from your options trading account that can be extracted and returned to your bank account to be used as extra income Or you can leave the profits in your trading account and use the

extra capital to trade a larger number of condors to make larger amounts of weekly profit My new software program is named SelfAdapINDXWeeklyCndrs which uses 3 Underlying Indices with Weekly Options I intend to show you how to trade 2 sigma Weekly Condors to obtain Initial Credits of greater than 20% return on your trading capital weekly yet avoid losses when the big 2 sigma changes occur     Weekly Options Trading to Maximize Your Capital Jon Schiller, Jon Schiller Phd, 2010-05-17 The US and the World financial systems collapsed in the Fall of 2008 which caused the US Treasury to initiate bailouts for several major US corporations The US Fed lowered the interest rates to zero % The US Congress and Treasury provided bailouts to prevent corporations such as GM AIG and banks from collapse A big chunk of AIG's payments 22.4 billion of 118.4 billion was made to Wall Street firms like Goldman Sachs GS Quote Bank of America BAC Quote Merrill Lynch and Morgan Stanley MS Quote as well as to foreign banks like Societe Generale Deutsche Bank DB Quote and Barclays BCS Quote These firms bought Credit Default Swaps CDS from the insurer CDSs insure counterparties against major losses on debt investments As the value of those investments declined AIG was obligated to provide collateral payments to the firms that purchased CDS This worsened the economic decline The OEX S P 100 index fell from 560.90 on 25 September 2008 to 411.90 on 27 October 2008 a drop of 149 points or 26.5% in one month This was the October 2008 stock market collapse During this same period my OEX weekly options trading capital went from 4,242 to 6,189 or an increase of 1,948 or 45.9% In other words when the stock market fell by 26% the weekly option trading value rose by 45.9% I want to show the reader how to trade OEX weekly Options These weekly options open on Friday to expire the following Friday Chapter 2 details the easy to use Weekly Option trading strategies     **SEC Docket** United States.
