Standards of Nursing Care Bonnie Wesorick, 1990

Holistic Stoma Care Patricia K. Black, 2000

Holistic Stoma Care is a holistic person centered textbook concerning the immediate nursing care of all patients with the complete range of stomas before during and after surgery Special emphasis is placed on socio cultural and psychological aspects The books approach is to move away from the bio medical view point that is taught in nursing and medicine today This enables the nurse to care for the patient as a whole not just for the stoma It endeavours to help the reader conceptualise the patients idea of disease and illness and its outcome Body image change after enterostomal surgery is transcultural but the extent to which change affects the individual and limits their fulfillment of social roles is culturally variable The book is divided into sections covering areas such as bowel cancer and inflammatory bowel disease resulting in a stoma adjuvant therapies and how overall they may have an effect on the patient and the current trials that the patient may be asked to enter and the development role research and ethics in stoma care today Holistic approach special emphasis on cultural

considerations Full range of stoma care covered including permanents and temporary stomas Body image with a stoma Multicultural issues

Critical Care Nursing Patricia Gonce Morton, 1998 This book is organized into five parts the first two of which cover areas applicable to all critical care patients including the patient's and family's experience education pain management ethical and legal issues and the rewards and challenges of critical care nursing The third part addresses specific populations including pediatric patients pregnant women older adults and postanesthesia patients as well as interfacility transport The balance of the book is arranged by body systems and concludes with multisystem problems This is the seventh edition of a text first published in 1973 and last published in 1994 The purpose is to present current comprehensive and practical information built on a holistic perspective of care in which the patient is the core of nursing practice This book meets a need for educating students and nurses in the critical care environment The editors' objective of providing a framework for focusing on patient responses in the critical care environment is met This book is intended for students in critical care educators and clinicians This edition is also tailored to meet the needs of patients The editors are excellent authorities in critical care nursing All three are practitioners and one is both practitioner and educator The contributors and reviewers are critical care experts The illustrations are used best to understand critical care technology The graphics used for anatomy physiology and patient assessment add to the usefulness of the text The references are pertinent and current but certain specialty content would need to be updated by the reader e.g. medication protocols for CHF The use of color in the text is managed carefully to guide and not overpower the reader The 1997 ACLS Guidelines are in Appendix 1 The Answer Key to Study Questions appears in Appendix 2 Anatomy and physiology patient assessment and clinical management nursing research collaborative plans of care teaching and home care issues are some of the innovations presented One strength of book is how it addresses the changes associated with aging and the needs of the older adult Aging concerns are covered in one chapter and are highlighted throughout the text This edition provides current information that makes the previous edition out of date I would recommend this text for beginning critical care nurses and for undergraduate nursing students for its coverage of advanced pathophysiological concepts
