Health Trackers Richard MacManus, 2015-08-01 New consumer technology is empowering us to take control of our day-to-day health. Leading tech writer Richard MacManus looks at what is out there now and what is in development and what this might mean for our health in the future. Health Trackers tells the story of the rise of self-tracking, the practice of measuring and monitoring one's health activities or diet. Thanks to new technologies such as smartphone apps and personal genomics, self-tracking is revolutionizing the health and wellness industries. Through interviews with tech developers, early adopters, and medical practitioners, Richard MacManus explores what is being tracked, what tools and techniques are being used, the best practices of early adopters, and how self-tracking is changing healthcare. The first eight chapters focus on a particular type of or approach to self-tracking, for example, diet, daily activity, and genetics. The final two chapters look at how the medical establishment is adopting and adapting to self-tracking. This timely book covers technologies still early in their evolution but poised to go mainstream and rather than look at how to use specific gadgets, it focuses on the philosophy and usefulness of self-tracking in its many forms. Many of us are curious about it but don't understand the benefits and sometimes risks of these tools and practices. With no comparable book on the market, Trackers is the first to focus on consumer technologies and to help ordinary people negotiate the new health landscape.

Fat and Unhappy Tristan Justice, Gina Bontempo, 2024-12-03 More than seventy years after Americans dutifully embraced the low fat diet in an era of industrialized food a nation left fat sick and depressed three generations later are now desperately looking for answers to combat the twin epidemics of obesity and chronic disease The contemporary phenomenon to promote body positivity under the banner of health at every size however is another corporate sponsored movement to accept obesity and chronic illness as the new norm while fundamentally transforming our healthcare system into a sick care system Big Food and Big Pharma have accomplished what Big Tobacco tried but failed hook generations of consumers on biochemically addictive products and discredit the consequences Everybody knows smoking kills Few understand that cereal will too The modern message of body positivity is an emotionally tempting doctrine to a public rightly frustrated by the guidance of the so called experts but in reality it remains a trojan horse for the food and

medical industries to prey on the physical insecurities and emotional turbulence of lifelong customers Female Body Image in Contemporary Art Emily L.
