Human-Centered AI Catherine Régis, Jean-Louis Denis, Maria Luciana Axente, Atsuo Kishimoto, 2024-03-22 Artificial intelligence AI permeates our lives in a growing number of ways Relying solely on traditional technology driven approaches won't suffice to develop and deploy that technology in a way that truly enhances human experience A new concept is desperately needed to reach that goal That concept is Human Centered AI HCAI With 29 captivating chapters this book delves deep into the realm of HCAI In Section I it demystifies HCAI exploring cutting edge trends and approaches in its study including the moral landscape of Large Language Models Section II looks at how HCAI is viewed in different institutions like the justice system health system and higher education and how it could affect them It examines how crafting HCAI could lead to better work Section III offers practical insights and successful strategies to transform HCAI from theory to reality for example studying how using regulatory sandboxes could ensure the development of age appropriate AI for kids Finally decision makers and practitioners provide invaluable perspectives throughout the book showcasing the real world significance of its articles beyond academia Authored by experts from a variety of backgrounds sectors disciplines and countries this engaging book offers a fascinating exploration of Human Centered AI Whether you're new to the subject or not a decision maker a practitioner or simply an AI user this book will help you gain a better understanding of HCAI's impact on our societies and of why and how AI should really be developed and deployed in a human centered future Human Interaction and Emerging Technologies (IHET-AI 2025): Artificial Intelligence and Future Applications Tareq Z. Ahram, Antonio Lopez Arquillos, Juan M. Gandarias, Adrian Morales Casas, 2025-04-28 Human Interaction and Emerging Technologies IHET AI 2025 Artificial Intelligence and Future Applications Proceedings of the 13th International Conference on Human Interaction Emerging Technologies Artificial Intelligence Future Applications Costa Del Sol Universidad de Málaga Malaga Spain April 22-24 *After the Software Wars* Keith Curtis, 2009 Computers are an advancement whose importance is comparable to the invention of the wheel or movable type While computers and the Internet have already changed many aspects of our lives we still live in the dark ages of computing because proprietary software is still the dominant model One might say that the richest alchemist who ever lived is my former boss Bill Gates Oracle founder Larry Ellison and Google co-founders Sergey Brin and Larry Page are close behind Human knowledge increasingly exists in digital form so building new and better models requires the software to be improved People can only share ideas when they also share the software to display and modify them It is the expanded use of free software that will allow a greater ability for people to work together and increase the pace of progress This book will demonstrate that a system where anyone can edit share and review the body of work will lead not just to something that works but eventually to the best that the world can achieve With better cooperation among our scientists robot driven cars is just one of the many inventions that will arrive pervasive robotics artificial intelligence and much faster progress in biology all of which rely heavily on software Publisher **The**
