A pipe fitter and welder are the tradesperson who install assemble fabricate maintain and repair mechanical piping systems. Pipe fitters usually begin as helpers or apprentices. A pipe fitter and welder deal with industrial commercial marine piping and heating cooling systems. Typical industrial process pipe is under high pressure which requires metals such as carbon steel stainless steel and many different alloy metals fused together through precise cutting threading grooving bending and welding. Pipe fitter and welder plan and test piping and tubing layouts cut bend or fabricate pipe or tubing segments and join those segments by threading them using lead joints welding brazing cementing or soldering them together. They install manual pneumatic hydraulic and electric valves in pipes to control the flow through the pipes or tubes. These workers create the system of tubes in boilers and make holes in walls and bulkheads to accommodate the passage of the pipes. They install. Pipe fitter and welder are often exposed to hazardous or dangerous materials such as asbestos lead ammonia steam flammable gases various resins and solvents including benzene and various refrigerants.
