*Microeconomics* Gary W. Yohe,Margaret Southwood,1992 [Capital in the History of Accounting and Economic Thought](#) Jacques Richard,Alexandre Rambaud,2021-11-29 Starting with the first scientific economists such as Cantillon 1755 and Quesnay 1758 and ending with Piketty 2019 this book explores the treatment of the concept of capital in the history of accounting and economic thought The work provides a rare juxtaposition of the reasoning discourse and writings of accountants and economists With regard to capital this approach highlights the ongoing struggle between these uncongenial twins as Kenneth Boulding put it for primacy in analysing and utilising capitalism But if they are certainly uncongenial the book also argues that it is wrong to ever classify these two disciplines as twins because they have taken very different paths ever since scientism came to dominate in economics and ethical and moral considerations were put to one side This book will be of significant interest to readers to history of economic thought critical accounting and heterodox economics [Green Economy Reader](#) Stanislav Shmelev,2016-09-22 State of the art in sustainability thinking inspired by interdisciplinary ideas of ecological economics This book is focusing on sustainability pathways new economic theory democracy and institutions multidimensional assessment of sustainability macroeconomic modelling and policies climate change and renewable energy resource flows and circular economy regenerative cities environmental conflicts and values It will be helpful for MSc and PhD students in Economics Management Environmental Change Ecological Economics Development Economics Sustainability and practitioners in business international and nongovernmental organizations Rich diverse and thought provoking collection of top level contributions it will help to facilitate the transition towards sustainability and educational

reform A fabulous composition of papers by the authors who really count Ernst von Weizsäcker The Club of Rome The authors present a refreshing perspective on the possibilities of human progress in harmony with nature without the need for economic growth to secure long term human welfare and wise use of nature's services Extremely relevant Peter May Past President International Society for Ecological Economics and Professor UFRRJ Rio de Janeiro Brazil The book goes well beyond the Green Economy offering arguments and blueprints for a complete makeover of the current economic system With multi and interdisciplinary contributions ranging from moderately to fundamentally critical of current economics it raises fundamental questions of value and power draws on a wide range of theories opens the eyes for the historical processes that brought about the current crises and demonstrates the value of ecological but also classical economic thinking to their solution If better politics require better theories this is a must read for academics and decision makers in the time of climate crisis Joachim Spangenberg Sustainable Europe Research Institute SERI Germany e V **Handbook for the Study of the United States** William Bate, Perry Frank, 1989 **The Principles of Economics Course** Phillip Saunders, 1990

**Recording for the Blind & Dyslexic, ... Catalog of Books**, 1996 *Climate Change isn't Everything* Mike Hulme, 2023-06-13 The changing climate poses serious dangers to human and non human life alike though perhaps the most urgent danger is one we hear very little about the rise of climatism Too many social political and ecological problems facing the world today from the Russian invasion of Ukraine to the management of wildfires quickly become climatized explained with reference to a change in the climate When complex political and ethical challenges are so narrowly framed arresting climate change is sold as the supreme political challenge of our time and everything else becomes subservient to this one goal In this far sighted analysis Mike Hulme reveals how climatism has taken hold in recent years becoming so pervasive and embedded in public life that it is increasingly hard to resist it without being written off as a climate denier He confronts this dangerously myopic view that reduces the condition of the world to the fate of global temperature or the atmospheric concentration of carbon dioxide to the detriment of tackling serious issues as varied as poverty liberty biodiversity loss inequality and international diplomacy We must not live as though climate alone determines our present and our future
