Human Genetics ,1980 *Study Guide for Maternity & Women's Health Care E-Book* Deitra Leonard Lowdermilk,Kitty Cashion,Kathryn Rhodes Alden,Shannon E. Perry 2019-08-06 NEW Chapter organization and content updated and revised to match changes to main text

What Evidence Shows that DNA Was Created by the God? Victor W. Chang, Guoping Song,2020-07-04 Where do we come from Who are we Where are we going These three questions continue to haunt human beings since ancient times and they are questions without any explanations The important conclusions from the human genome test of the DNA coding sequence The autosomes are not different between men and women These conclusions irreversibly refute the traditional theory of evolution We have raised this simple question to seven M D Ph D including three professors who specialize in biology Why are autosomes not different between men and women Invariably their answer was either I cannot explain or I don t know To me as a computer engineer the human genome is equivalent to a software package If we are certain that the 2 9 billion codes of autosomes are not different between men and women then the autosomes must be from the same source sequence of coding I am sure that such a huge coding sequence must have a maker He made the human genome Now we can reach another conclusion the first woman came from the first man by the fact that the 2 9 billion codes of autosomes are not different between men and women The next conclusion is that the first man never came from a woman and he must have neither physical parents nor a regular physiological birth This is a key to open the origins of mankind DNA reveals to us the truth that God created life
