The Jews and the Nation Frederic Jaher, 2009-01-10 This book is the first systematic

comparison of the civic integration of Jews in the United States and France specifically from the two countries revolutions through the American republic and the Napoleonic era 1775 1815 Frederic Jaher develops a vehicle for a broader and uniquely rich analysis of French and American nation building and political culture He returns grand theory to historical scholarship by examining the Jewish encounter with state formation and Jewish acquisition of civic equality from the perspective of the paradigm of liberal inclusiveness as formulated by Alexis de Tocqueville and Louis Hartz Jaher argues that the liberal paradigm worked for American Jews but that France s illiberal impulses hindered its Jewish population in acquiring full civic rights He also explores the relevance of the Tocqueville Hartz theory for other marginalized groups particularly blacks and women in France and America However the experience of these groups suggests that the theory has its limits A central issue of this penetrating study is whether a state with democratic liberal pretensions America can better protect the rights of marginalized enclaves than can a state with authoritarian tendencies France The Tocqueville Hartz thesis has become a major issue in political science and this book marks the first time it has been tested in a historical study The Jews and the Nation returns a unifying theory to a discipline fragmented by microtopical scholarship *The Routledge Companion to Labor and Media* Richard Maxwell, 2015-07-16 Labor resides at the center of all media and communication production from the workers who create the information technologies that form the dynamic core of the global capitalist system and the designers who create media content to the salvage workers who dismantle the industry s high tech trash The Routledge Companion to Labor and Media is the first book to bring together representative research from the diverse body of scholarly work surrounding this often fragmentary field and seeks to provide a comprehensive resource for the study and teaching of media and labor Essays examine work on the mostly unglamorous side of media and cultural production technology manufacture and every occupation in between Specifically this book features wide ranging international case studies spanning the major global hubs of media labor interdisciplinary approaches for thinking about and analyzing class and labor in information communication technology ICT consumer electronics CE and media cultural production an overview of global political economic conditions affecting media workers reports on chemical environments and their effect on the health of media workers and consumers activist scholarship on media and labor and inspiring stories of resistance and solidarity *The Fiske Guide to Colleges 2004* Edward B.
