Tafarodi, 2013-09-23 What is it like to be a person today To think feel and act as an individual in a time of accelerated social cultural technological and political change This question is inspired by the double meaning of subjectivity as both the first personness of consciousness being a subject of experience and the conditioning of that consciousness within society being subject to power authority or influence The contributors to this volume explore the perils and promise of the self in today s world Their shared aim is to describe where we stand and what is at stake as we move ahead in the twenty first century They do so by interrogating the historical moment as a predicament of the subject Their shared focus is on subjectivity as a dialectic of self and other or individual and society and how the defining tensions of subjectivity are reflected in contemporary forms of individualism identity autonomy social connection and political consciousness

Routledge International Handbook of Theoretical and Philosophical Psychology Brent D. Slife, Stephen C. Yanchar, Frank C. Richardson, 2021-12-28 Routledge International Handbook of Theoretical and Philosophical Psychology is a compilation of works by leading scholars in theoretical and philosophical psychology that offers critical analyses of and

alternatives to current theories and philosophies typically taken for granted in mainstream psychology. Within their chapters, the expert authors briefly describe accepted theories and philosophies before explaining their problems and exploring fresh new ideas for practice and research. These alternative ideas offer thought provoking ways of reinterpreting many aspects of human existence often studied by psychologists. Organized into five sections, the volume covers the discipline of psychology in general, various subdisciplines e.g. positive psychology and human development, concepts of self and identity as well as research and practice. Together, the chapters present a set of alternative ideas that have the potential to take the field of psychology in fruitful directions not anticipated in more traditional theory and research. This handbook will be a valuable resource for students and scholars of the theory, assumptions, and history of psychology.

Society in the Self Hubert J. M. Hermans, 2018-03-09. Instead of considering society as a social environment, *Society in the Self* begins from the assumption that society works in the deepest regions of self and identity as expressed in phenomena like self sabotage, self radicalization, self cure, self government, self nationalization, and self internationalization. This leads to the central thesis that a democratic society can only function properly if it is populated by participants with a democratically organized self. In this book, an integrative model is presented that is inspired by three versions of democracy: cosmopolitan, deliberative, and agonistic. Democracy with the latter focusing on the role of social power and emotions. Drawing on these democratic views, three levels of inclusiveness are distinguished in the self: personal I as an individual, social I as a member of a group, and global I as a human being. A democratic self requires the flexibility of moving up and down across these levels of inclusiveness and has to find its way in fields of tension between the self and the other and between dialogue and social power. As author Hubert Hermans explains, this theory has far reaching consequences for such divergent topics as leadership in the self, cultural diversity in the self, the relationship between reason and emotion, self empathy, cooperation and competition between self parts, and the role of social power in prejudice, enemy image construction, and scapegoating. The central message of this book is reflected in Mahatma Gandhi's dictum: Be the change you want to see in the world.

Hot Equations Jesse S. Cohn, 2024-04-23. Inspired by the new diversity of science fiction, fantasy, and horror in the twenty-first century, *Hot Equations: Science Fiction, Fantasy, and the Radical Imagination on a Troubled Planet* confronts the kinds of literary and political realism that continue to suppress the radical imagination. Alluding both to the ongoing climate catastrophe and to Tom Godwin's *The Cold Equations*, that famous touchstone of hard science fiction, *Hot Equations* reads the crises of our post-normal moment via works that increasingly subvert genre containment and spill out into the public sphere. Drawing on archives and contemporary theory, author Jesse S. Cohn argues that these imaginative works of science fiction, fantasy, and horror strike at the very foundations of modernity, calling its basic assumptions into question. They threaten the modern order with a simultaneously terrible and promising anarchy, pointing to ways beyond the present medical, ecological, and political crises of pandemic, climate change, and rising global fascism. Examining books ranging from well-known titles like *The Hunger Games*

and *The Caves of Steel* to newer works such as *Under the Pendulum Sun* and *The Stone Sky* Cohn investigates the ways in which science fiction fantasy and horror address contemporary politics social issues and more The cold equations that established normal life in the modern world may be in shambles Cohn suggests but a New Black Fantastic makes it possible for the radical imagination to glimpse viable possibilities on the other side of crisis

Media Transparency in China

Baohui Xie, 2014-08-20 This book argues that the gap between the official transparency rhetoric and the censorship reality has demonstrated the discrepancy between what the Party is and what it claims to be Such a discrepancy is manifested by the reality that the reformed news industry a hybrid of market oriented commercialization and party state control has largely failed to deliver either the voice of the disenfranchised groups or the value of journalism To observe the discrepancy this book investigates the role of transparency in the Chinese news media Media transparency which goes beyond the issue of censorship and press freedom has been undermined by the consensus reached between the party state and the media on political and market control It is this mutually accommodating and benefiting scheme between power and profits that has been hollowing out the substance of the transparency rhetoric and distorting the Marxist idea of press freedom as freedom for all This book argues that the cause of such a gap between rhetoric and reality is rooted in the disjuncture of political representation of both the party state and the profit seeking media

Theories of Resistance Marcelo Lopes de

Souza, Richard J. White, Simon Springer, 2016-06-17 Space is never a neutral stage on which social actors play their roles sometimes cooperating with each other sometimes struggling against each other Space has multiple and complex functions in the development of social relations it is a reference for identity building a material condition for existence and an instrument of power This book explores the ways in which space has been used for resistance especially in left libertarian contexts From the early anarchist organizing efforts in the 19th century to the contemporary social movements of the Mexican Zapatistas the chapters examine a range of cases to illustrate both the limits and potentialities of utilizing space within anarchist practice By theorizing the production of anarchist spaces the book aims to foster new geographical imaginations that energetically cultivate alternative practices to challenge the status quo It shows that spatial re organization spatial practices and spatial resources are also a basic condition for human emancipation autonomy and freedom

Theology and the Experience of God Dale M. Schlitt, 2000 Theology and the Experience of God is an implicit critical dialogue with Hegel's philosophy of religion and Anglo American experientialist traditions It suggests that the ancient Christian tradition of theology as faith seeking understanding *fides quaerens intellectum* should be reinterpreted today as the experience of God seeking understanding *experientia Dei quaerens intellectum* It presents fundamental theology

in this light and then reflects on aspects of three specific experiences of God namely the charismatic experience of the Spirit the call of the risen One to a renewed Christian ecumenism and the role of the aging in reminding the Christian community that God is its goal This book continues with further more systematic theological reflections on faith hope and love on the reality of sin and on the experience of the Trinity and ends with a reflection on the reign and realm of God as movement of enriching experience or spirit **21st Century Afro Review** ,1996 **Leisure Studies** Edgar Lionel Jackson,Thomas L. Burton,1999 In this edited volume Jackson and Burton have attempted no less than an assessment of what is known about recreation and leisure at the beginning of the twenty first century In doing this they have drawn on the talents of top scholars in various areas of study and done so from a carefully conceived vision of what was needed Jackson and Burton have also done the reader the great favor of being both aggressive and meticulous editors a rarity among such edited volumes This book is the only comprehensive statement of what is known about recreation and leisure as the twenty first century begins with its heightened potential to create a world in which such knowledge is critical to well being Leisure Studies Prospects for the Twenty First Century provides both a retrospective examination of what has been achieved in leisure studies in the twentieth century the last few decades in particular and a look into the future This book offers new perspectives on preexisting and emerging themes and is a significant contribution to the literature **On Willing Selves** Sabine Maassen,B.
