## **Towards New Cisg Prospective International:**

*Towards a New CISG* Leandro Tripodi, 2015-11-24 In *Towards a New CISG* Leandro Tripodi discusses the aging and need for renovation of the 1980 Vienna Sales Convention. Changes in global political circumstances and to the economy of international sales of goods have rendered the 1980 CISG a dated legal instrument. Its recognized flexibility is not sufficient to cope with past and especially with future changes brought about by the introduction of new technologies affecting all kinds of goods subject to trade. In light of the challenges posed by 21st century commerce Dr Tripodi proposes the adoption of a Convention on the International Sale of Goods and Services CISGS. The idea of a new convention is based on the following facts: 1 goods and services are no longer as distinguishable as they were in 1980; 2 sales of goods and sales i.e. the provision of services are not as easy to apportion as the CISG supposes and can hardly continue to be treated separately by the legal sources of international trade.

**The Elgar Companion to UNIDROIT** Thomas John, Rishi Gulati, Ben Köhler, 2024-04-12 This comprehensive Companion provides a unique overview of UNIDROIT the primary independent organisation coordinating the practice of international private law across its 65 member states. As the third in the suite of titles covering the three sisters of uniform private law and private international law it considers UNIDROIT's role in the creation of existing uniform law as well as posing questions about its future in the sector.

Routledge Handbook on Transnational Commercial Law Bruno Zeller, Camilla Baasch Andersen, 2025-02-21 This handbook edited by Zeller and Andersen is an indispensable contribution to the field of transnational commercial law. With an introduction by Sir Roy Goode this book presents perspectives on legal issues of international sales transactions as perceived by world leading experts exposing pragmatic and modern aspects of everything from drafting to uniform laws to dispute resolution. The book divides itself between fundamental knowledge of transnational commercial law e.g. chapters on forum shopping CISG Cape Town Convention etc. and current and topical developments e.g. chapters on blockchain smart contracts metaverse digital assets etc. International or transnational trade during the past twenty years has become more and more important outstripping domestic trade as a hallmark of economic success. Model laws developed by the United Nations and other international bodies are now being transplanted or ratified by countries so a translational element must always be considered as part of any choice of law. Addressing a global audience as the instruments dealt with herein apply to many states in different regions this handbook aims not only at an undergraduate and graduate student audience but also will interest professional lawyers.

*The Harmonisation of National Legal Systems* Antonios E. Platsas, 2017-10-27 This book offers a novel perspective on the leading concept of harmonisation advocating the mutual benefits and practical utility of harmonised law. Theoretical models and factors for harmonisation are explored in detail. Antonios E. Platsas acknowledges a range of additional factors and presents harmonisation as a widely applicable and useful theory.

**Counseling Emerging Companies in Going International** Alan S. Gutterman, 1994 The decision to begin activities in

a foreign jurisdiction has become a natural milestone for most growing businesses in the United States regardless of size This volume focuses on key legal considerations that must be taken into account when engaging in international business transactions

*Commentaries on European Contract Laws* Nils Jansen, Reinhard Zimmermann, 2018-07-12 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law

Symposium ,2007      **Commentary on the UNIDROIT Principles of International Commercial Contracts (PICC)** Stefan Vogenauer, Jan Kleinheisterkamp, 2009

The UNIDROIT Principles of International Commercial Contracts are the result of the ambitious quest for codifying the *lex mercatoria* i e those unwritten rules of the game by which merchants presumably have always understood to do international business Since the publication of their first version in 1994 the UNIDROIT Principles have had an impressive success They have become a serious alternative to national contract laws in international disputes decided by arbitral tribunals such as those administered by the International Chamber of Commerce ICC At the same time they have been accepted as a model for reforming the laws on international contract as recently Russia Lithuania and China With the publication of a new version of the Principles in 2004 this first phase of codifying international contract law is now considered to be finished While there is much writing about the theoretic legal nature and the practical applicability of the Principles there is hardly any research on their substance meaning their substantive rules on contracts This book fills this gap A comprehensive analysis of each provision of the Principles allows a better understanding of the rules governing international contracts In short this book contributes to make the application of the Principles more predictable and thus more efficient

Carbon-Free Shipping and Shipping Carbon Stephen Girvin,Vibe Ulfbeck,2024-08-22 This book explores the private law implementation of the new international and EU regulatory framework targeting decarbonisation in the shipping industry Compared with other sectors the shipping industry has traditionally been labelled a slow mover concerning the sustainability agenda However new regulatory measures on carbon reduction both internationally and in the EU require fundamentally new developments in the industry This book focuses on the goal of carbon reduction from a private law perspective and considers how the new regulatory framework can be implemented in the shipping industry This book studies existing contractual provisions in charterparties and bills of lading alongside new contractual model clauses designed to facilitate carbon reduction It considers how the new clauses should be interpreted whether they will transform traditional shipping contracts into more collaborative contracts and how they will interact with other clauses in the contract and with other contracts in the supply chain The contractual analysis is considered in context reflecting on enforcement issues such as Port State Control PSC the Poseidon Principles and climate change litigation The book also analyses the related topic of shipping contracts for carbon storage as a necessary means of meeting carbon reduction targets The book is intended to pave the way

for understanding how core shipping contracts can work in this new context and the extent to which the new types of clauses will profoundly transform contracts It presents contributions by experienced and younger academics and practitioners from Asian European and Scandinavian legal systems      **The International Sale of Goods** Michael G. Bridge, 1999 This work provides a much needed detailed treatment of the international sale of commodities It focuses on all the key issues in international commodity sales including the contractual construction of FOB and CIF terms import export licenses frustration and risk termination for breach and damages An important feature of the book is the comprehensive analysis of the legal principles that arise from terms of the standard contracts promulgated by trading associations such as GAFTA and FOSFA The book also includes detailed coverage of all the important recent statutory developments in the law of sale namely the Carriage of Goods by Sea Act 1992 and the Sale of Goods Amendment Act 1995 There is also in depth analysis of the UN Convention on the International Sale of Goods
