Prediction Machines, Updated and Expanded Ajay Agrawal, Joshua Gans, Avi Goldfarb, 2022-11-15 Named one of The five best books to understand AI by The Economist The impact AI will have is profound but the economic framework for understanding it is surprisingly simple Artificial intelligence seems to do the impossible magically bringing machines to life driving cars trading stocks and teaching children But facing the sea change that AI brings can be paralyzing How should companies set strategies governments design policies and people plan their lives for a world so different from what we know In the face of such uncertainty many either cower in fear or predict an impossibly sunny future But in Prediction Machines three eminent economists recast the rise of AI as a drop in the cost of prediction With this masterful stroke they lift the curtain on the AI is magic hype and provide economic clarity about the AI revolution as well as a basis for action by executives policy makers investors and entrepreneurs In this new updated edition the authors illustrate how when AI is framed as cheap prediction its extraordinary potential becomes clear Prediction is at the heart of making decisions amid uncertainty Our businesses and personal lives are riddled with such decisions Prediction tools increase productivity operating machines handling documents communicating with customers Uncertainty constrains strategy Better prediction creates opportunities for new business strategies to compete The authors reset the context describing the striking impact the book has had and how its argument and its implications are playing out in the real world And in new material they explain how prediction fits into decision making processes and how foundational technologies such as quantum computing will impact business choices Penetrating insightful and practical Prediction Machines will help you navigate the changes on the horizon

AI in Supply Chains Maxime C. Cohen, Tinglong Dai, 2025-12-10 Bringing together some of the world's foremost supply chain thinkers this book shows how artificial intelligence AI is rewriting the rules of global supply chain management It explores machine learning computer vision large language models and generative AI in action how they're used to refine demand forecasts optimize inventories and drive down costs while service levels soar The book examines AI driven demand forecasting and inventory optimization which enhances the accuracy of predicting customer demand and managing inventory levels to reduce costs and improve service It covers intelligent logistics and transportation management and utilizing AI to optimize routing scheduling and fleet management which leads to increased efficiency and sustainability The discussion extends to procurement and supplier relationship management where procurement processes are streamlined and supplier partnerships are strengthened through AI driven analytics and decision making tools In turn the book confronts the hard questions of ethics data privacy and algorithmic bias equipping readers to harness AI's power responsibly and ethically across the entire supply chain These topics are vital as they address the pressing need for supply chains to become more agile resilient and responsive in today's rapidly changing global market By exploring these areas the book aims to provide readers with a nuanced understanding of the current landscape and future directions of AI in supply chain management The

problem this book sets out to solve is the knowledge gap between the theoretical potential of AI and its practical application within supply chains around the globe. By presenting real world examples, case studies and expert analyses, it offers actionable insights that can be applied to enhance operational efficiency and strategic decision making. The book is intended for supply chain professionals, business leaders, academics, policymakers and students seeking a better grasp of the intersection of AI and supply chain management. It serves as both a reference guide and a source of inspiration for those looking to leverage AI technologies to drive innovation and competitiveness in their organizations.
