Chapters in *Prevention Practice in Substance Abuse* are grouped into three areas: background chapters contain information related to prevention in the United States; data-based chapters present the most recent national and international evaluation findings; and conceptual chapters stimulate thought about drug abuse prevention. A concluding chapter explores recommendations for joint activities and presents methods for both practice and research to enhance knowledge development. Specific topics addressed by the contributing authors include mass media campaigns, morality and substance abuse, Hungarian adolescent drug abuse, parenting practices, social influences, oriented substance abuse prevention curricula, choosing a paradigm to guide research and practice. *Prevention Practice in Substance Abuse* is an ideal guide for drug and alcohol practitioners and researchers who wish to become more effective in their work using strategies for cooperating with each other to combat the use and abuse of drugs and alcohol.
