Tours That Bind Shaul Kelner, 2012 Winner 2010 Association for Jewish Studies Jordan Schnitzer Book Award 2011 Honorable Mention for the American Sociological Association Culture Section's Mary Douglas Prize for Best Book Since 1999 hundreds of thousands of young American Jews have visited Israel on an all expense paid 10 day pilgrimage tour known as Birthright Israel The most elaborate of the state supported homeland tours that are cropping up all over the world this tour seeks to foster in the American Jewish diaspora a lifelong sense of attachment to Israel based on ethnic and political solidarity Over a half billion dollars and counting has been spent cultivating this attachment and despite 9 11 and the ongoing Israeli Palestinian conflict the tours are still going strong Based on over seven years of first hand observation in modern day Israel Shaul Kelner provides an on the ground look at this hotly debated and widely emulated use of tourism to forge transnational ties We ride the bus attend speeches with the Prime Minister hang out in the hotel bar and get a fresh feel for young American Jewish identity and contemporary Israel We see how tourism's dynamism coupled with the vibrant human agency of the individual tourists inevitably complicate tour leaders efforts to rein tourism in and bring it under control By looking at the broader meaning of tourism Kelner brings to light the contradictions inherent in the tours and the ways that people understand their relationship to place both materially and symbolically Rich in detail engagingly written and sensitive to the complexities of modern travel and modern diaspora Jewishness *Tours that Bind* Shaul Kelner, 2010-04-19 Since 1999 hundreds of thousands of young American Jews have visited Israel on an all expense paid 10 day pilgrimage tour known as Birthright Israel The most elaborate of the state supported homeland tours that are cropping up all over the world this tour seeks to foster in the American Jewish diaspora a lifelong sense of attachment to Israel based on ethnic and political solidarity Over a half billion dollars and counting has been spent cultivating this attachment and despite 9 11 and the ongoing Israeli Palestinian conflict the tours are still going strong *Report of a Tour in the Central Provinces and Lower Gangetic Doab in 1881-82* Sir Alexander Cunningham, 1884 *Managing a Library Binding Program* Association of Research Libraries, 1993 Library binding is one of the activities typically included in newly created preservation departments but librarians continue to discover that transforming a traditional binding program into one that better meets preservation objectives requires considerable investment of time This resource guide is intended to help libraries review their binding activities from a preservation perspective through the following 1 suggesting a strategy for gaining expertise through reading and observation 2 outlining a plan for evaluating the library's and the binder's practices and policies 3 presenting a strategy for initiating change and 4 identifying issues that merit attention and discussion Thirty six articles dealing with a binding program and relations with a binder are presented A bibliography lists an additional 18 sources for further reading SLD *A Tour of C++* Bjarne Stroustrup, 2013-09-16 The C 11 standard allows programmers to

express ideas more clearly simply and directly and to write faster more efficient code Bjarne Stroustrup the designer and original implementer of C thoroughly covers the details of this language and its use in his definitive reference *The C Programming Language Fourth Edition* In *A Tour of C* Stroustrup excerpts the overview chapters from that complete reference expanding and enhancing them to give an experienced programmer in just a few hours a clear idea of what constitutes modern C In this concise self contained guide Stroustrup covers most major language features and the major standard library components not of course in great depth but to a level that gives programmers a meaningful overview of the language some key examples and practical help in getting started Stroustrup presents the C features in the context of the programming styles they support such as object oriented and generic programming His tour is remarkably comprehensive Coverage begins with the basics then ranges widely through more advanced topics including many that are new in C 11 such as move semantics uniform initialization lambda expressions improved containers random numbers and concurrency The tour ends with a discussion of the design and evolution of C and the extensions added for C 11 This guide does not aim to teach you how to program see Stroustrup's *Programming Principles and Practice Using C* for that nor will it be the only resource you'll need for C mastery see Stroustrup's *The C Programming Language Fourth Edition* for that If however you are a C or C++ programmer wanting greater familiarity with the current C language or a programmer versed in another language wishing to gain an accurate picture of the nature and benefits of modern C you can't find a shorter or simpler introduction than this tour provides
