Copyright and Anonymity in the Creative User-Generated World

Rachel Maguire, 2025-05-01 This book explores the relationship between copyright law, online anonymity and creative user-generated content (CUGC). Presenting original empirical findings, the book evaluates the co-existence of copyright law and normative systems regulating a CUGC landscape made up of artists, photographers and writers, and makes novel recommendations for copyright reform. It takes a multi-jurisdictional approach across Anglo-American and EU legal systems, using the UK, USA and Germany as representative jurisdictions for legal analysis. Qualitative findings are drawn from creators and communities on Reddit and 4chan. Copyright subsists in much CUGC, but pervasive anonymity makes it difficult for the law to regulate it effectively. Simultaneously, anonymity offers creative benefits in a way that highlights flaws in traditional justifications of copyright. Comparisons between community norms and copyright law identify practical differences but also fundamental compatibilities in terms of ownership expectations. However, the simultaneous existence of legal and normative enforcement mechanisms complicates matters for creators and potential users with negative implications for creativity and copyright law. While existing reform efforts have made suggestions to create a UGC exception, these overlook and undermine the role of CUGC creators as copyright holders. This can be addressed through the consideration of a framework of supplementary CUGC guidelines when developing such reforms. This valuable resource for researchers and students provides a distinct perspective in framing CUGC creators as copyright holders, examining online anonymity as a pivotal factor influencing regulation.

Move Slowly and Build Bridges Robert W. Gehl, 2025 Move Slowly and Build Bridges tells the story of activists, software developers, artists and everyday people who have built the fediverse, a large, noncentralized alternative social media system. In contrast to big tech corporations like Meta, TikTok or X, the fediverse is comprised of thousands of small, independent communities who use a powerful internet protocol to communicate with one another. These small communities can govern themselves and moderate content at the human scale, in stark contrast to the global and advertiser-friendly interests of Meta or X. The Mastodon network is perhaps the most notable and successful platform in the fediverse. Founded in 2016, Mastodon has positioned itself as an alternative to Twitter, one that can be completely under the control of its members from its daily operations to its underlying software. Making a noncentralized, ethically run social media system is no easy task. The people building the fediverse have faced burnout, bigotry, angry debates and death threats. And they face constant nagging doubts: can we really do this? Can noncentralized social media survive? Can we all of us have

our own social media In this thoroughly researched book Robert W Gehl argues that the answer is yes but it won't be easy
