Electronic Commerce 2018 Efraim Turban, Jon Outland, David King, Jae Kyu Lee, Ting-Peng Liang, Deborrah C. Turban, 2017-10-12

This new Edition of Electronic Commerce is a complete update of the leading graduate level advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks mostly the Internet. It is the process of electronically buying and selling goods, services and information. Certain EC applications such as buying and selling stocks and airline tickets online are reaching maturity some even exceeding non Internet trades. However EC is not just about buying and selling it also is about electronically communicating, collaborating and discovering information. It is about e learning, e government, social networks and much more. EC is having an impact on a significant portion of the world affecting businesses, professions, trade and of course people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks especially Facebook, LinkedIn and Instagram and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally especially in China where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI based analytics and big data to enhance the field. Finally some emerging EC business models are changing industries e.g. the shared economy models of Uber and Airbnb.

The 2018 9th edition brings forth the latest trends in e commerce including smart commerce, social commerce, social collaboration, shared economy, innovations and mobility.

Electronic Commerce Efraim Turban, David King, Jae Kyu Lee, Ting-Peng Liang, Deborrah C. Turban, 2015-01-29

Throughout the book theoretical foundations necessary for understanding Electronic Commerce (EC) are presented ranging from consumer behavior to the economic theory of competition. Furthermore this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields including a senior vice president of an e commerce related company. The authors provide website resources, numerous exercises and extensive references to supplement the theoretical presentations. At the end of each chapter a list of online resources with links to the websites is also provided. Additionally extensive, vivid examples from large corporations, small businesses from different industries and services, governments and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples which were collected by both academicians and practitioners show the reader the capabilities of EC, its cost and justification and the innovative ways corporations are using EC in their operations. In this edition previous editions published by Pearson Prentice Hall the authors bring forth the latest trends in e commerce including social businesses, social networking, social collaboration, innovations and
