Ranking Business Schools Linda Wedlin, 2006-01-01 In her admirable book Wedlin entangles what business school rankings really are and why they have become so important. The book contains plenty to interest the growing army of business school employees whose duties at least in part are concerned with boosting their institution's position in the rankings. Education and Training In times when the management education field is increasingly impacted by a proliferation of ranking exercises this book is a timely and welcome contribution. Linda Wedlin unpacks for us the real meaning of the contemporary explosion of rankings. Rather than simple classification schemes and mechanisms rankings are, she suggests, arenas where the field of business education is being created and re-created. They are the loci of boundary work whereby a field is progressively evolving and constituting itself. This is a convincing study relying on rich empirical data and carefully anchored in relevant theoretical debates. A must read for all those academics, students, policy makers and education professionals who want to understand the complex contemporary logics of higher education in management but also probably well beyond. Marie Laure Djelic ESSEC Business School Paris France League tables appear everywhere and have become important aspects of business school environments. Based on in-depth and creatively combined empirical studies Linda Wedlin provides us with explanations and insights on the emergence and impact of such rankings. This book should be of great value for all those who seek to play the ranking game. It gives a fresh perspective on how classification mechanisms drive the emergence, boundary setting and change of organizational fields. Kerstin Sahlin Andersson Uppsala University Sweden A fascinating study of the complex issues surrounding MBA rankings. Business schools really hate them but at times have to pretend to love them. Magazines and newspapers are really interested in their sales potential but have to make pretensions about their veracity. Linda Wedlin focuses on an area rich in hypocrisy and hype but also one where there are real consequences ranking furthered reinforces the homogenising tendencies of MBAs. Anthony Hopwood Said Business School University of Oxford UK This is a most fascinating topic dealt with in a manner which is both serious and entertaining everyone in a business school would want to read it. Linda Wedlin's excellent research is presented with a no-nonsense approach if there is anything worth counting she counts it and then interprets it no fuss. Exemplary Barbara Czarniawska Gteborg University Sweden This engaging book offers a fresh perspective on the burgeoning field of European management education and its intense concern with rankings. Using a creative mix of well-crafted research tools Wedlin deftly captures a professional field in transition as it both expands and develops shared standards. Walter W Powell Stanford University US International comparisons and rankings of universities and business schools have proliferated in recent years. *Ranking Business Schools* provides a welcome analysis of this development and its implications for the field of management education theorizing the role of classifications such as rankings in forming and structuring organizational fields. Focusing on the European experience with rankings and the subsequent response the book illustrates how business schools use rankings to

form identities and positions and to draw boundaries for the field By both creating and confirming belonging to a business school community and providing distinction within that group rankings are important for defining an international field of management education organizations constructing an international business school market and constitute an arena for debating and establishing the boundaries of this field Building an extensive theoretical framework for understanding classification **The Best 300 Business Schools, 2011 Edition**, 2010 Provides a detailed overview of the best business schools across North America including information on each school's academic program competitiveness financial aid admissions requirements and social scenes Original [Business Rankings Annual](#), 1999-11 The staff of the Business Library of the Brooklyn Public Library answers more than 175 000 reference questions each year many of them requests for rankings information To provide quick answers to questions in the highest interest subject areas we have compiled Business Rankings Annual Working from bibliographic file we have built up over the years we have culled thousands of items from periodicals newspapers financial services directories statistical annuals and other printed material The top ten from each of these rankings appears in this volume grouped under standard subject headings for easy browsing [Business Week](#), 2007
