Gangopadhyaya, 2021-09-14 The conference on Interdisciplinary Research in Technology and Management was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme. By attempting to bring diverse inter related topics on a common platform the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across domains in the management field as well. The spectrum of topics covered in the research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day *Broken Windows, Broken Business* Michael

The same principle applies to business. Drawing on real world corporate examples from JetBlue's decision to give fliers what they really want leather seats personal televisions online ticketing to Google's customer based strategy for breaking out of the pack of Internet search engines to business to business firms successes and failures Levine proves again and again how constant vigilance and an obsession with detail can make or break a business or a brand.
