### *Industry 5.0 and Paradigm Shift—Emerging Challenges*

Namit Gupta, Roopa Shinde, Rakesh Kumar Malviya, Anjali Gupta, 2023-01-23 Industry 5.0 is the successor of the Industry 4.0 concept which employed high technology in the manufacturing industry. Industry 5.0 is a new idea that adds a human touch to the work of robots and smart machines. The basic idea of humans and machines working together is to increase efficiency and effectiveness like the Internet of things (IoT). It aims to merge the increasing cognitive computing abilities of the robots with the intelligence and resourcefulness of the humans. The progress of Industry 5.0 is inevitable. As the technology grows more each day we find ways to make our work simpler. The development of such technologies to make the world more efficient requires its manufacturers, i.e., humans who collaborate with these machines and technologies. Humans are indispensable resources as what a machine can do is limited. And with all these efficiencies we have come so far there is no path leading us back. With adoption of new concepts comes a paradigm shift as development continues and we move from Industry 4.0 which speaks of the future of production, its primary purpose continues to be achieving seamless connectivity between machines and IT systems for higher productivity and efficiencies across the value chain. Overall it focuses mainly on traditional financial and operational KPIs. Whereas Industry 5.0 gives a human touch to the concept of 4.0 keeping in mind the well-being of the environment and society, making the machines and humans work together on a path of Green Future. Industry 5.0 has the balance of both humans and technologies which benefits the ecosystem with discovery of new energy sources and renewable resources helping in a sustainable working environment. It can be used to reduce harmful residue caused due to manufacturing processes and recycle rare materials. Taking this theme the multidisciplinary congress on Industry 5.0 and Paradigm Shift Emerging Challenges will highlight research challenges and open issues that should be further developed to realize Industry 5.0.

**Impact of FinTechs on the Banking Sector. Competitor or Partner for Traditional Banks?** Alice Hofmann, 2021-06-29 Bachelor Thesis from the year 2018 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 10 University of Applied Sciences Essen language English abstract This paper will analyse if traditional banks deal with the continuous digitization and new technology based competitors especially FinTechs as a threat or rather as a chance for their own business model. Is it more likely that banks and FinTechs will link up as partners to benefit from mutual competitive advantages or will it degenerate into a battle for power and market share. Furthermore why is it that small start ups can present such a threat to established banks that have been operating for years. Innovative start ups revolutionized several business sectors. There was Napster for the music industry, Uber for the taxi industry and there are FinTechs for the financial sector. FinTech is an abbreviation for Financial Technology. The designation itself already gives an idea of what their business idea looks like. Intelligent technologies and the continuously expanding digitization across all business sectors expands the customers needs and demands towards banks. They want to take care of banking business as easily and convenient as they order goods via Amazon, ask Google for the way or stream music and movies online via Spotify or Netflix. FinTech has recognized that change in customer behaviour and started to build their business models based on these findings. Those new innovative market entrants are present in every part of the value chain of a traditional bank offering alternative financial products and services on a purely online basis. Traditional banks are therefore facing significant challenges and risks that are endangering their competitiveness.

## **Dividend Imperative: How Dividends Can Narrow the Gap Between Main Street and Wall Street**

Daniel Peris,2013-04-02 IF YOU RE INVESTED IN THE FUTURE OF THE STOCK MARKET THIS IS YOUR WAKE UP CALL DIVIDENDS ARE NOT THE PROBLEM THEY RE PART OF THE SOLUTION Forget the Great Recession According to fund manager and author Daniel Peris the real threat to investment returns from stocks is the Great Retreat a 30 year drop in the dividend payout ratio of the leading corporations in the United States that has rendered the U S stock market a grand casino rather than a business investment platform Peris believes that profit distributions the dividends of publicly traded corporations are the greatest indicators of a business s success Investors and company executives should focus on them This is The Dividend Imperative a bold new vision for anyone interested in having a stronger broader and healthier stock market for everyone If you re a personal investor this book will show you how to identify and invest in companies that value shareholders by rewarding them with ample growing dividends If you re a portfolio manager this book will help you shift your focus from near term earnings to long term dividends even if it goes against conventional wisdom If you re a business leader this book will show you how to restore trust and confidence in the corporate world the stock market and the future of investing This is no get rich quick scheme or one size fits all money guide It is a realistic tightly reasoned approach to dividend investing that could have far reaching effects on Main Street and Wall Street alike Using real world case studies and analytic models Peris shows investors and companies that concentrating on dividend generation and growth can lead to mutually rewarding results You ll learn why stocks go up when dividends go up and what it means to a company s bottom line

You'll discover practical financial tools for assessing the value of higher dividend payouts and determining the value of a dividend growth trajectory. Even if your direct stock market experience has been disappointing or your mutual funds have performed poorly in recent years, refocusing your efforts on dividend strategies can provide just the vision you need to achieve long term success with your investments. This is what business is all about. This is how investors and companies can share profits, build trust and create opportunities for the future. This is *The Dividend Imperative*. You've seen the markets swing from bubble to scandal and back again. You've watched the divide between Wall Street and Main Street grow larger each year. You've wished there was a strategic approach to investing that strengthened portfolios, benefited companies and bolstered the economy as well. The answer according to business investor Daniel Peris is simple: You need to focus on dividends. Investors need to demand bigger dividends and U.S. corporations need to pay out more of their profits as dividends. This is **THE DIVIDEND IMPERATIVE**, a powerful new call to action for investors and corporate leaders by the acclaimed author of *The Strategic Dividend Investor*. Peris's ideas about aligning interests through higher dividend payments may be counter to current Wall Street wisdom, but savvy investors should trust Peris to guide them toward a strategy that focuses on generating strong long term returns. JOHN EADE, President, Argus Research. Peris makes a compelling case that investors and companies need to focus more on dividends, which have accounted for the lion's share of stock market returns. JOHN HEINZL, Toronto's *The Globe and Mail*. If you're a shareholder and not a near term shareseller, you deserve a better deal. Most companies can afford to pay higher dividends. Here's why they should. Investors who like cash should cheer for Peris. JEFFREY KOSNETT, editor of *Kiplinger's Investing for Income*. The book is a rallying cry for long term investors to regain their rightful position using a simple but very powerful tool that they have at their disposal: demand for increased dividends.
