Student's Name: _____

Goodreads began as a simple idea with a big promise: help people find books they will love and connect them with other readers. Launched in 2006, it quickly became a vibrant meeting place for anyone who reads for pleasure, study, or work. The site combines growth of books — like tracking what you've read and making lists — with social features that let readers share opinions, discover recommendations, and join conversations. For many, Goodreads has become a literary hub where shared passions

The engine of Goodreads made built for a moment came to many founders: a personal read. Its early creators wanted a place to organize their reading and to see what friends were enjoying. As the platform matured, it incorporated everything reviews, rating readers, and recommendations powered by user activity. Over time Goodreads shifted from a small community project into a global service used by millions. Publishers and authors noticed, and the platform began to shape reading trends just as much as it reflected them. Its evolution mirrors the broader digital turn in publishing: a mix of user-generated content, algorithms, suggestions, and direct engagement between creators and consumers.

At its core, Goodreads consists of user profiles, book pages, and activity streams. Each book page collects publication data, editions, user ratings, and reviews. Profiles let people list their shelves — such as "to-read" or "favorites" — and display reading progress. The user features are built to support discovery and sustained engagement. This leads to a growing network of friends, friends of friends, and a sense of community. The site also offers a "book of the month" feature, which gives users a goal to read. The site is also a place where users can find challenges, such as reading a certain number of books in a year, and can join groups to discuss books. The site is also a place where users can find book clubs, and can join groups to discuss books. The site is also a place where users can find book clubs, and can join groups to discuss books.
