Innovate to Dominate Tai Ming Cheung, 2022-08-15 In Innovate to Dominate Tai Ming Cheung offers insight into why how and whether China will overtake the United States to become the world's preeminent technological and security power. This examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order. The techno security domain Cheung argues is where national security innovation and economic development converge and it has become the center of power and prosperity in the twenty first century. China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security innovation and development is essential in enabling China to compete for global dominance. Cheung offers a richly detailed account of how China is building a potent techno security state. In Innovate to Dominate he takes readers from the strategic vision guiding this transformation to the nuts and bolts of policy implementation. The state led top down mobilizational model that China is pursuing has been a winning formula so far but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century if not sooner. Innovate to Dominate is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national technological military and security spheres and how this is taking place. Cheung authoritatively addresses the burning questions being asked in capitals around the world. Can China become the dominant global techno security power? And if so when

The Nature Delusion Tom Oliver, 2026-03-24 A pathbreaking synthesis Gus Speth. Rigorous and compelling Michael Foley. Why our current fixes for the environmental crisis are making things worse and what we need to do about it. Does the future of humankind lie in colonising a new planet or uploading our minds to a

digital metaverse Listening to certain billionaires and technophiles you might think these are our best bets for escaping the increasingly hostile world we've made for ourselves The Nature Delusion dismantles these ideas It shows why technological and economic fixes alone cannot solve the existential threat of climate change and why they remain out of reach for most people Instead this book uncovers the root causes of our environmental crisis from our disconnection from nature to our focus on short term self centred priorities and offers a hopeful vision for the future As the environmental crisis deepens it's easy to feel powerless or overwhelmed The Nature Delusion invites you to see humanity's place in the world in a radically new way and demonstrates how transforming our mindset can create a healthier more resilient world *The Guide to Simulations/Games for Education and Training* Robert E. Horn, Anne Cleaves, 1980-03 This is the fullest guide to available games and simulations for use in business and education There are over 1 400 separate entries about half of them new to this edition giving each game's name copyright manufacturer price age and number of players together with a full description Twenty four essays evaluate and contrast games for specific settings making this a consumer report for game users
