

## **Reflection and Refraction Vocabulary**

**Reflection** – When light, heat or sound is bounced off of a surface or object without being absorbed.

**Law of Reflection** – The law of reflection states that the Angle of Incidence (the angle that the light comes in at) is equal to the Angle of Reflection (the angle that the light leaves at).

**The Normal** – The normal is a perpendicular ( $90^\circ$ ) line that is drawn at the point where an incoming ray of light strikes the surface.

**Incident Angle** – The angle located between the incoming ray of light, and the drawn normal. (INSIDE ANGLE)

**Reflected Angle** – The angle located between the reflecting ray of light, and the drawn normal. (INSIDE ANGLE)

**Regular Reflection** – When parallel rays of light hit a smooth surface, they reflect at the same angle and produce a sharp, clear reflection.

**Diffuse Reflection** – When parallel rays of light hit a bumpy, rough, uneven surface, they reflect at different angles, produce an unclear reflection.

(Each ray of light still follows the law of reflection, but they hit the surface at different angles because of the uneven surface)

**Improving Education in the US** Rafael Yanushevsky,2011 US education is in crisis This history and analysis of the education system is an essential primer for parents teachers and school administrators as well as parent teacher organizations education majors education administration majors the media politicians and everyone who wants to see American schools do a better job The author considers the genesis of public schools in the United States various aspects of public education systems from elementary school through university trends in education and reform and issues that still need to be addressed The book contains information about public and private organizations think tanks institutions and

governmental bodies involved in public education reform The book shows the deficiency of the existing education system and compares it to more efficient systems The author shows that most of the existing approaches to improve education are based on the same foolish idea that as long as government spending on education is great enough the improvement will follow The bond between education and politics hinders progress in education The problems facing schools as well as the recommended solutions are considered The author cites multiple research attempts to improve the functioning of the existing education system that have still failed to bring any tangible results He uses his specialized knowledge to explain what should be done for educational progress to become reality **Jewelers Review** ,1899 *Modern Space Science* Frederick E.
