ACUTE RENAL FAILURE

Acute Kidney Injury

Acute kidney injury (AKI) is a sudden loss of kidney function. It can be caused by various factors, including dehydration, low blood pressure, and certain medications. The kidneys filter waste products from the blood and help regulate blood pressure and fluid balance. When they don't work properly, waste products can build up in the body, leading to complications like fluid retention and electrolyte imbalances.

Causes

- Dehydration
- Low blood pressure
- Medications (e.g., antibiotics, pain relievers)
- Injuries or infections
- Obstruction in the urinary tract

Diagnosis

AKI is often diagnosed based on a combination of symptoms and laboratory tests. These tests can include blood and urine samples to check for signs of kidney damage and dysfunction.

Treatment

The goal of treatment is to identify and manage the underlying cause of AKI. This may involve fluid replacement, medications to support kidney function, and dialysis in severe cases.

ACUTE PULM

Acute Respiratory Distress Syndrome (ARDS)

Acute respiratory distress syndrome (ARDS) is a severe lung condition that causes difficulty breathing. It is often triggered by a lung infection or injury. Causes

- Severe lung infection (e.g., pneumonia)
- Injury to the lung (e.g., from a car accident)
- Fluid in the lungs (e.g., from heart failure)
- Medications or drugs (e.g., certain antibiotics)

Diagnosis

ARDS is diagnosed based on symptoms and physical examination. A chest X-ray and blood tests can help confirm the diagnosis.

Treatment

The main goal of treatment is to support breathing and oxygen levels. This may involve mechanical ventilation, medications to reduce inflammation, and other supportive care.

ASTHMA

Chronic Obstructive Pulmonary Disease (COPD)

Chronic obstructive pulmonary disease (COPD) is a long-term lung condition that causes breathing difficulties. It is often caused by smoking or exposure to other irritants. The airways become inflamed and narrowed, making it hard to breathe. COPD can lead to chronic coughing, shortness of breath, and other complications.

Causes

- Smoking
- Exposure to air pollution or other irritants
- Genetics

Diagnosis

COPD is diagnosed based on symptoms and physical examination. A chest X-ray and blood tests can help confirm the diagnosis.

Study Guide Outline For Critical Care Nursing:

Critical Care Study Guide Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up to date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines a comprehensive multidisciplinary approach presenting the information is essential. Similar to the multidisciplinary approach that is used to care for the critically ill patient we have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU and nursing care of the ICU patient.
