

# Matter—Properties and Changes

## Lesson 2.1 Properties of Matter

In your textbook, read about physical properties and chemical properties of matter.

Use each of the terms below just once to complete the passage.

chemical density	mass properties	physical substance
---------------------	--------------------	-----------------------

Matter is anything with (1) MASS and volume. A (2) SUBSTANCE is a form of matter with a uniform and unchanging composition. Substances have specific, unchanging (3) PROPERTIES that can be observed. Substances have both physical and chemical properties. (4) PHYSICAL properties can be observed without changing a substance's chemical composition. Color, hardness, and (5) DENSITY are examples. Other properties cannot be observed without changing the composition of a substance. These are called (6) CHEMICAL properties. An example is the tendency of iron to form rust when exposed to air.

Label each property as either *physical* or *chemical*.

CHEM	7. Chemical formula H <sub>2</sub> O
CHEM	8. Forms green carbonate when exposed to moist air
CHEM	9. Remains unchanged when in the presence of nitrogen
PHYS	10. Colorless
PHYS	11. Solid at normal temperatures and pressures
CHEM	12. Ability to combine with another substance
PHYS	13. Melting point
PHYS	14. Liquid at normal temperatures and pressures
PHYS	15. Boiling point is 100°C
PHYS	16. Conducts electricity

*Resources for Teaching Middle School Science* Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-03-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on

inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type: core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved, and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.
