Subsistence And Survival In The Sahel:

Subsistence and Survival in the Sahel E. J. A. Harts-Broekhuis, Ali A. Jong, 1993 *Abstracts on Rural Development in the Tropics*, 1994 **East African Ecosystems and Their Conservation** T. R. McClanahan, T. P. Young, 1996 East Africa is one of the most diverse and interesting tropical area on the planet. It is home not only to the last great megafaunal assemblage but also to human populations with the highest growth rates. This book draws on the expertise of leading ecologists each intimately familiar with a particular set of East African ecosystems to provide the first in depth and integrated account of the ecology, management threats and conservation of these diverse ecosystems. Summarizing the tremendous wealth of scientific research that has come out of East Africa in the last few decades each chapter analyses a given ecosystem type taking the reader through the basics of its ecology, its historical use and misuse by humans and its prospects for conservation. Throughout the book linkages and similarities among ecosystems are emphasized. The historical and contemporary role of humans in shaping these ecosystems is considered. Fundamental principles of ecology are considered and interesting case studies are highlighted. Students and researchers in ecology, conservation biology and environmental sciences will find this book useful in their work.

Nomadic Peoples, 1997 **Animal Research and Development**, 1991 Africa's Future Duncan Clarke, 2012-02-09 Many seek to fix Africa: economists, experts, politicians, gurus, cognoscenti and glitterati. But the continent conceals multiple secrets, including the Holy Grail explanations of its saga over the previous centuries. Africa's Future tells the tale of Africa's economic evolution, revealing unique prisms for understanding the continent's panoramic story, one of triumph over the lasting influences of nature and multiple political tragedies. Modern Africa developed diverse economic pathways to betterment, yet survivalist economies litter the landscape. Its paradox of subsistence with many faces coexists amidst the tiny middle class growing rich and many more poor. Expected in the future, Clarke provides fresh and challenging insights into Africa's economies and future, offering seasoned views on a continent of unlocked potential which has witnessed many false dawns. Not poor but poorly managed, Africa holds greater promise, its destiny revealed by its history.

Integration of GIS and Remote Sensing Victor Mesev, 2008-03-11 In an age of unprecedented proliferation of data from disparate sources, the urgency is to create efficient methodologies that can optimise data combinations and at the same time solve increasingly complex application problems. Integration of GIS and Remote Sensing explores the tremendous potential that lies along the interface between GIS and remote sensing for activating interoperable databases and instigating information interchange. It concentrates on the rigorous and meticulous aspects of analytical data matching and thematic compatibility, the true roots of all branches of GIS remote sensing applications. However, closer harmonization is tempered by numerous technical and institutional issues, including scale incompatibility, measurement disparities and the inescapable notion that data from GIS and remote sensing essentially represent diametrically opposing conceptual views of reality. The first part of the book defines and characterises GIS and remote

sensing and presents the reader with an awareness of the many scale taxonomical and analytical problems when attempting integration The second part of the book moves on to demonstrate the benefits and costs of integration across a number of human and environmental applications This book is an invaluable reference for students and professionals dealing not only with GIS and remote sensing but also computer science civil engineering environmental science and urban planning within the academic governmental and commercial business sectors

Africa is characterised by widespread and deeply entrenched poverty armed conflict slow economic development until recently and agricultural systems proven to failure during frequent and persistent drought With its tremendous natural resources and remarkable social and ecological diversity the continent reflects a close dependency of people on natural resources This background report illustrates that it is this dependency that will present Africa with potentially severe adaptive problems in dealing with the twin effects of climate change and population growth in future years More than ever Africa and its partners need to work together to turn deforestation around to save its green lungs to manage its cities and to grow food for its hungry millions
