Play Therapy with Adults Charles E. Schaefer, 2003-06-02 Learn how to incorporate adult play therapy into your practice with this easy to use guide. In the Western world there has been a widening belief that play is not a trivial or childish pursuit but rather a prime pillar of mental health along with love and work. Play Therapy with Adults presents original chapters written by a collection of international experts who examine the diverse approaches and clinical strategies available for successfully incorporating play therapy into adult client sessions. This timely guide covers healing through the use of a variety of play therapy techniques and methods. Various client groups and treatment settings are given special attention including working with adolescents, the elderly, couples, individuals with dementia, and clients in group therapy. Material is organized into four sections for easy reference: Dramatic role play, Therapeutic humor, Sand play, and doll play. Play groups, hypnoplay, and client centered play. Play Therapy with Adults is a valuable book for psychologists, therapists, social workers, and counselors interested in helping clients explore themselves through playful activities.

Integrating Video Game

Research and Practice in Library and Information Science Ratliff, Jacob A., 2015-02-28 Video games are now a ubiquitous form of media used by the majority of the American population. However, the academic research field surrounding this genre does not accurately reflect the pervasive influence of video games. The field of library and information sciences helps provide the necessary foundational support for this media. Integrating Video Game Research and Practice in Library and Information Science brings together video gaming culture and its unique forms of communication with information behavior research. By detailing the nuances of video games and their influence, this reference book reveals communication patterns within society and provides comprehensive background and analysis for libraries, librarians, and information professionals.
