

TEST AND COMMISSIONING MANUAL

Refer to the Substation Controlled Drawings - 1 - 2866827 and associated Substation Controlled Drawings Quick Reference Guide - 2913527 for details of the drawing management process.

The Greenlining and Bluelining of Ergon Energy Substation Drawings - 2597658 describes how continuity and functional testing is carried out during the testing and commissioning process.

Note that:

- Greenlining is carried out on the Greenlining Test Copy (Drawing Set 6). Each workgroup must use a different colour highlighter from the previous workgroup when doing continuity testing, and clearly identify on the first drawing of the set which colour belongs to them. Green is always reserved for the first workgroup.
- Bluelining is carried out on the Bluelining Test Copy (Drawing Set 12). Each workgroup must use a different colour highlighter from the previous workgroup when doing functional testing, and clearly identify on the first drawing of the set which colour belongs to them. Blue is always reserved for the last (SIT) workgroup.

Drawing Sets 1 (Master Copy), 6 and 12 are not "owned" by any one workgroup - the workgroup doing the relevant work is the temporary custodian before passing the drawings on to the next workgroup. If another workgroup has the drawing set you need, it is still your responsibility to transfer the relevant mark-ups / Greenlining / Bluelining to the correct set when you receive it.

Drawing sets shall not be split up between different workgroups because of the risk of losing drawings or making errors in version control.

It is the responsibility of the Officer Responsible for Testing to ensure that all mark-ups recorded on the "Bluelining Test Copy" (Drawing Set 12) are transferred to the "Site Initial Record Copy" (Drawing Set 13) and the "Master Copy" (Drawing Set 1) prior to returning the drawings to the Project Manager.

The "Site Initial Record Copy" (Drawing Set 13) will be retained on site with all mark-ups for use as the site copy until it is replaced with "Substation As Constructed" (Drawing Set 20) copy. The "Site Initial Record Copy" will not be used for capturing testing progress.

When on site, test and commissioning activities have been completed the "Bluelining Test Copy" will be retained by the local test section such that they can perform operational response duties. The "Bluelining Test Copy" will be retained by the local test section until the "Test Section As Constructed" copy (Drawing Set 21) are issued to the test section.

9. SUBMISSION OF APPLICATION FOR WORK REQUESTS AND SYSTEM OUTAGES

The Commissioning Officer is accountable for tentatively entering APV's relating to integration and testing activities in the Ergon Energy FeederSTAT system. The Commissioning Officer should be recorded as the APV applicant (to ensure they are automatically notified of any changes to or the rejection of the APV). It will be the responsibility of the supervisors of crews working under the APV to review the APV to ensure it is suitable for the work being undertaken. Where contractors are working under the APV, the Contracts Officer / Project Delivery Co-ordinator is required to review the APV to ensure it is suitable for the work being undertaken.

Where planned field crews performing the work change due to unforeseen circumstances it is the responsibility of the supervisor to ensure that newly appointed staff are provided sufficient time to review and familiarise themselves with the APV details.

The Commissioning Officer will provide ongoing support as required to ensure that the co-ordination of multiple work groups is correctly reflected in the APV.
