Weather Architecture Jonathan Hill:

Weather Architecture Jonathan Hill, 2013-06-17 Weather Architecture further extends Jonathan Hill's investigation of authorship by recognising the creativity of the weather. At a time when environmental awareness is of growing relevance the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design, construction and use in a creative dialogue with other authors such as the architect and user. Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together. Rather than investigate architecture's relations to the weather in isolation they are integrated into a wider discussion of cultural and social influences on architecture. The analysis of weather's effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts, sciences and society leading to a critical re-evaluation of contemporary responses to climate change.

The Architecture of Ruins

The Architecture of Ruins Jonathan Hill, 2019-03-25 The Architecture of Ruins: Designs on the Past, Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty-first century in which a building is designed, occupied and imagined as a ruin. This design practice conceives a monument and a ruin as creative, interdependent and simultaneous themes within a single building, dialectically addressing temporal and environmental questions in poetic, psychological and practical terms and stimulating questions of personal and national identity, nature and culture, weather and climate, permanence and impermanence, and life and death. Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past, the present and the future in a single architecture. Structured around a collection of biographies, this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society. Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones, the chapters investigate an evolving, interdisciplinary design practice to show the relevance of historical understanding to design. Like a history, a design is a reinterpretation of the past that is meaningful to the present. Equally, a design is equivalent to a fiction, convincing users to suspend disbelief. We expect a history or a novel to be written in words but they can also be delineated in drawing, cast in concrete or seeded in soil. The architect is a physical novelist as well as a physical historian. Like building sites, ruins are full of potential. In revealing not only what is lost but also what is incomplete, a ruin suggests the future as well as the past. As a stimulus to the imagination, a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity, indicating that a building can remain unfinished literally and in the imagination, focusing attention on the creativity of users as well as architects. Emphasising the symbiotic relations between nature and culture, a building designed, occupied and imagined as a ruin acknowledges the coproduction of multiple authors, whether human, non-human or atmospheric, and is an appropriate model for architecture in an era of increasing climate change.

Reading Architecture and Culture Adam Sharr,2012-11-12 Architecture

displays the values involved in its inhabitation construction procurement and design It traces the thinking of the individuals who have participated in it their relationships and their involvement in the cultures where they lived and worked In this way buildings their details and the documents used to make them can be read closely for cultural insights Introducing the idea of reading buildings as cultural artefacts this book presents perceptive readings by eminent writers which demonstrate the power of this approach The chapters show that close readings of architecture and its materials can test commonplace assumptions help architects to appreciate the contexts in which they work and indicate ways to think more astutely about design The readings collected in this innovative and accessible book address buildings specifications and photographs They range in time from the fifteenth century examining the only surviving drawing made by Leon Battista Alberti to the recent past projects completed by Norman Foster in 2006 and Herzog and De Meuron in 2008 They range geographically from France to Puerto Rico to Kazakhstan and they range in fame from buildings celebrated by critics to house extensions and motorway service areas Taken together these essays demonstrate important research methods which yield powerful insights for designers critics and historians and lessons for students

Actions of Architecture Jonathan Hill,2003-09-02 Drawing on the work of a wide range of architects artists and writers this book considers the relations between the architect and the user which it compares to the relations between the artist and viewer and the author and reader The book s thesis is informed by the text The Death of the Author in which Roland Barthes argues for a writer aware of the creativity of the reader Actions of Architecture begins with a critique of strategies that define the user as passive and predictable such as contemplation and functionalism Subsequently it considers how an awareness of user creativity informs architecture architects and concepts of authorship in architectural design Identifying strategies that recognize user creativity such as appropriation collaboration disjunction DIY montage polyvalence and uselessness Actions of Architecture states that the creative user should be the central concern of architectural design

Immaterial Architecture Jonathan Hill,2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill s explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice
