

The background of the book cover features a complex, abstract design. It includes a prominent DNA double helix structure in the upper left. Below it, a large, multi-layered structure composed of numerous small, circular molecules in shades of blue, green, and orange is visible. The overall color palette is warm, with orange, yellow, and red tones blending into the background. The text is overlaid on this image.

The Education of a College President James Rhyne Killian, 1985 The Education of a College President is a personal account of the author's association with M I T for sixty years as student editor and administrative officer including his service as President from 1948 to 1959 and as Chairman of the Corporation Interwoven with this account of an unusual career at one of the world's leading science based universities is the story of Killian's excursions into the public sector as the nation's first full time presidential science adviser when NASA and our national space program were created and Eisenhower began initial efforts to ban atmospheric nuclear tests and to encourage disarmament Attention is also paid to his role as the father of public television In his memoir Killian shows how M I T grew from an

engineering school offering technical courses to undergraduates into a research university of a unique kind with a new focus on developing better links between the two cultures of science and the humanities He provides an inside report on the major events and policies of his administration the establishment of a School of Humanities and Social Science the rationale for the later formation of a School of Management and many improvements in the Institute's environment Following his student days at M I T Killian joined the staff and later became editor of the institute's alumni journal Technology Review In 1939 he became President Karl T Compton's Executive Assistant He became Vice President of the Institute in 1943 President in 1948 and Chairman of the Corporation in 1959 James R Killian has received numerous awards including the Public Welfare Medal of the National Academy of Sciences the first Vannevar Bush Award of the National Science Board the Hoover Medal one earned degree S B and thirty nine honorary degrees He is the author of Sputnik Scientists and Eisenhower and coauthor with Harold E Edgerton of Moments of Vision both published by The MIT Press **Linguistic Aspects in Machine Translation** Alexander Täuschel, 2008-10 Project Report from the year 2006 in the subject English Language and Literature Studies Other grade 1 3 University of Frankfurt Main Institut für England und Amerikastudien course Translation and Intercultural Communication 26 entries in the bibliography language English abstract This paper will give a general overview of the venture that is machine translation with particular focus on linguistic aspects It will display history of MT and will deal with some of the major issues in the realisation of MT like the difficulty of translating prepositions or integrating semantics as well as the importance of real world knowledge To illustrate these difficulties with examples on a basic level a practice test with a moderately complex translation engine provided by Google has been carried out and will be explained Finally I am going to introduce three of the largest and most powerful translation machines currently in use I will also give a brief overview of methods of MT The aim of this paper is to show that the realisation of the primal idea of machine translation in its original sense which was to perform translation without human intervention except during the construction phase of the system is still markedly far away at present and machines are still unlikely to take over the jobs of human translators

Comprehensive Biophysics , 2012-04-12 Biophysics is a rapidly evolving interdisciplinary science that applies theories and methods of the physical sciences to questions of biology Biophysics encompasses many disciplines including physics chemistry mathematics biology biochemistry medicine pharmacology physiology and neuroscience and it is essential that scientists working in these varied fields are able to understand each other's research Comprehensive Biophysics Nine Volume Set will help bridge that communication gap Written by a team of researchers at the forefront of their respective fields under the guidance of Chief Editor Edward Egelman Comprehensive Biophysics Nine Volume Set provides definitive introductions to a broad array of topics uniting different areas of biophysics research from the physical techniques for studying macromolecular structure to protein folding muscle and molecular motors cell biophysics bioenergetics and more The result is this comprehensive scientific resource a valuable tool both for helping researchers come to grips quickly with

material from related biophysics fields outside their areas of expertise and for reinforcing their existing knowledge Biophysical research today encompasses many areas of biology These studies do not necessarily share a unique identifying factor This work unites the different areas of research and allows users regardless of their background to navigate through the most essential concepts with ease saving them time and vastly improving their understanding The field of biophysics counts several journals that are directly and indirectly concerned with the field There is no reference work that encompasses the entire field and unites the different areas of research through deep foundational reviews Comprehensive Biophysics fills this vacuum being a definitive work on biophysics It will help users apply context to the diverse journal literature offering and aid them in identifying areas for further research Chief Editor Edward Egelman E I C Biophysical Journal has assembled an impressive world class team of Volume Editors and Contributing Authors Each chapter has been painstakingly reviewed and checked for consistent high quality The result is an authoritative overview which ties the literature together and provides the user with a reliable background information and citation resource

Rice Science and Development Politics Robert S.

Anderson,Edwin Levy,Barrie M. Morrison,1991 In 1960 the International Rice Research Institute IRRI opened near Manila in the Philippines It s goal was to help solve world food problems in such a way that the foundations economic and political concerns about Asia would be allayed This book is about IRRI s planning and development the efforts to persuade Asian governments to try to increase food production by following IRRI s advice and the interplay of IRRI s technology rice scientists and national research strategies Focusing on conditions in Sri Lanka and Bangladesh this study testifies to the necessity that the fundamental diversity of rice agriculture should be the organizing principle for an adequate research strategy and shows how strategies which are based on other organizing principles have met continuous difficulties and have ultimately been revised or abandoned This book will be of particular interest to development and agricultural economists and sociologists

Emery's Elements of Medical Genetics Robert F. Mueller,Ian D. Young,Alan E. H.
