Weibull Radar Clutter Weibull Radar Clutter:

Weibull Radar Clutter Matsuo Sekine, Yuhai Mao, 1990 The material presented in this book is intended to provide the reader with a practical treatment of Weibull distribution as applied to radar systems This book is primarily written for radar engineers Topics include general derivation of Weibull distribution measurements of Weibull distributed clutter comparison of Weibull distribution with various distributions including Rayleigh gamma log normal and k distributions to name just a few

Weibull Radar Clutter Matsuo Sekine, Yuhai Mao, 1990 *The Radar Range Equation for the Detection of Steady Targets in Weibull Clutter* Leon C. Rountree, AIR FORCE INST OF TECH WRIGHT-PATTERSON AFB OH., 1990 In this thesis the detection characteristics of a steady target immersed in radar clutter characterized by returns statistically modeled according to a Weibull probability density function are developed A detector model is developed by modifying an envelope detection scheme used to detect deterministic signals in Gaussian noise By examining the statistics of the detector output under alternate hypotheses an expression for the probability of detection P_d is developed in terms of the probability of false alarm P_{fa} the signal to clutter ratio SCR and the Weibull skewness parameter b which is a function of the type of terrain causing the clutter This expression is used in conjunction with a form of the radar range equation for area clutter to describe the relationship between P_d , P_{fa} , SCR, b and the radar detection range This relationship involves Marcum's Q function and an algorithm is presented which evaluates this function The algorithm is a series approximation also presented as a recursive relationship that can be computed to a desired precision Plots of P_d versus SCR and P_d versus range are developed for various values of P_{fa} and b The plots provide a means of evaluating the detector performance and predicting the radar detection range for several values of b
