STEAM Meets Story Gloria D. Campbell-Whatley, Diane Rodríguez, Jugnu Agrawal, 2021-06-11 This innovative STEAM guide will help general and special education teachers to increase effective instruction with adolescents grades 5 10 The authors show teachers how to link STEM concepts with popular fiction and film selections as a catalyst to launch student interactions discussions projects and investigations This approach will promote problem solving and reasoning skills by initiating the scientific process rather than simply presenting established facts The book includes a wealth of lesson plans that connect abstract STEM ideas to realistic experiences that students encounter Sample lessons call on students to produce drawings and models that move STEM to STEAM Grounded in popular film and some of the most read young adult books the text includes teaching strategies found to be effective with traditionally underserved students and those with disabilities Book Features Standards based STEM lessons interrelated and interwoven with writing reading speaking and other skills Practical ideas and hands on activities for engaging adolescents in both traditional and virtual environments Guidance for working with diverse populations such as students with different abilities culturally and linguistically diverse students translingual students and transnational students Templates handouts and lessons linked to Star Wars The Giver The Immortal Life of Henrietta Lacks Harry Potter To Kill a Mockingbird Star Trek The Matrix Holes and more *Longshot* David Heath, 2022-01-18 This is the incredible story of the scientists who created a coronavirus vaccine in record time In Longshot investigative journalist David Heath takes readers inside the small group of scientists whose groundbreaking work was once largely dismissed but whose feat will now eclipse the importance of Jonas Salk s polio vaccine in medical history With never before reported details Heath reveals how these scientists overcame countless obstacles to give the world an unprecedented head start when we needed a COVID 19 vaccine The story really begins in the 1990s with a series of discoveries that were timed perfectly to prepare us for the worst pandemic since 1918 Readers will meet Katalin Karik who made it possible to use messenger RNA in vaccines but struggled for years just to hang on to her job There s also Derrick Rossi who leveraged Karik s work to found Moderna but was eventually expelled from his company And then there s Barney Graham at the National Institutes of Health who had a career long obsession with solving the riddle of why two toddlers died in a vaccine trial in 1966 a tragedy that ultimately led to a critical breakthrough in vaccine science With both foresight and luck Graham and these other crucial scientists set the course for a coronavirus vaccine years before COVID 19 emerged in Wuhan China The author draws on hundreds of hours of interviews with key players to tell the definitive story about how the race to create the vaccine sparked a revolution in medical science *Blended Learning: Engaging Students in the New Normal Era* Richard Chen Li, Simon K.
