*The transHuman Code* Carlos Moreira,David Fergusson,2019-06-04 A Humanitarian Approach to a Technologically Innovative Future In The transHuman Code authors Carlos Moreira and David Fergusson ask Are we building a better future for humanity with the help of magnificent technology or are we instead building a better future of better technology at the expense of humanity We must learn to put humanity first instead of getting caught up in the promise of technological advancement Humans have been able to adapt morph and compromise in every situation we have faced over the centuries and have been able to maintain dominance We must approach the promises of technology with the same adaptability What the authors propose is that if we

start the design of the transHuman future from a human perspective making sure that technology will inspire revolution or evolution then we can ensure humanity continues to thrive The transHuman Code tries to center humanity in the emerging tension between a human controlled or a machine controlled world Moreira and Fergusson examine how humans can maintain the uniqueness and the humanity in this brave new world

**Love Sewing Issue 121 - 2023** Magazines Global,

Love Sewing Issue 121 2023 [Facebook, the Media and Democracy](#) Leighton Andrews,2019-08-29 Facebook the Media and Democracy examines Facebook Inc and the impact that it has had and continues to have on media and democracy around the world Drawing on interviews with Facebook users of different kinds and dialogue with politicians regulators civil society and media commentators as well as detailed documentary scrutiny of legislative and regulatory proposals and Facebook s corporate statements the book presents a comprehensive but clear overview of the current debate around Facebook and the global debate on the regulation of social media in the era of surveillance capitalism Chapters examine the business and growing institutional power of Facebook as it has unfolded over the fifteen years since its creation the benefits and meanings that it has provided for its users its disruptive challenge to the contemporary media environment its shaping of conversations and the emerging calls for its further regulation The book considers Facebook s alleged role in the rise of democratic movements around the world as well as its suggested role in the election of Donald Trump and the UK vote to leave the European Union This book argues that Facebook in some shape or form is likely to be with us into the foreseeable future and that how we address the societal challenges that it provokes and the economic system that underpins it will define how human societies demonstrate their capacity to protect and enhance democracy and ensure that no corporation can set itself above democratic institutions This is an important research volume for academics and researchers in the areas of media

studies communications social media and political science **On Value and Valuation** John Frow,2025-11-14 On Value and Valuation asks whether the category of economic value remains theoretically viable how value is formed and how it should be understood It explores the interlinkages between economic value and social and cultural values On the one hand the book draws on anthropological and sociological accounts of the evaluative frameworks within which things take on their social meanings on the other it explores and critiques the Marxist account of the formation of value in capitalist production Its aim is to reconcile these two conceptions and it does so by arguing that economic value is not a property of goods and services but is formed in specific institutions of valuation It analyses new sources of value generated in markets in derivatives in carbon credits and ecosystem services in expert systems and in new digital entities and seeks to deepen our understanding of value as a force driven by a web of social relations of accumulation that channel power and coercion This book will be of interest to students of heterodox economics and Marxist theory as well as to those with a wider concern with questions of social and economic value
