Comparative Development of India & China Neena Sondhi, Ramakrushna Panigrahi, Miao Pang, Rajashri Chatterjee, 2020-12-01 The prodigious economic growth of India and China over the last three decades has ensured their rightful prominence in the global economic order. The two players opened up their respective economies to liberalization and market regulations which led to a tectonic shift from agriculture based economies to manufacturing and service based economies. In this context, Comparative Development of India and China offers contemporary research on economic, technological, sectoral and sociocultural issues by highlighting the opportunities as well as vulnerabilities in the development of the two fastest growing nations in the world. It unveils the similarities of thought and practices and explores the plethora of possibilities for collaborative effort that may serve to contribute to the prosperity and progress of both the countries. The perspectives presented by various Indian and Chinese scholars in this edited volume provide varied outlooks and insights on these two nations albeit within a single thematic framework.
