Building Smart Home Automation Solutions with Home

Assistant Marco Carvalho,2023-09-15 A step by step guide to building cost effective and complete home automation DIY projects using tools such as Home Assistant Raspberry Pi IoT devices the Tasmota sensor ESP32 and Grafana Key Features Learn by doing using real life practical examples to build your own home automation system Create hack and configure IoT devices through hands on projects to be used with or without Home Assistant Customize your home automation system using Home Assistant Node RED InfluxDB and Grafana Purchase of the print or Kindle book includes a free PDF eBook Book DescriptionPicture a home where you can adjust the lighting based on the time of day or when movement is detected In this same home you can also detect when a door is unexpectedly opened or an alarm is triggered in response to any suspicious activity Such automated devices form part of a smart home and the exciting part is that this book teaches you how to create and manage these devices all by yourself This book helps you create your own ecosystem to automate your home using Home Assistant software You'll begin by understanding the components of a home automation system and learn how to create hack and configure them to operate seamlessly Then you'll set up Home Assistant on a Raspberry Pi to work as a home automation server build your own IoT sensors based on ESP32 ESP8266 and set up real life automation use cases using hands on examples and projects The chapters will also guide you in using software tools such as Node RED InfluxDB and Grafana to manage present and use data collected from your Home Automation devices Finally you'll gain insights into new technologies and trends in the home automation space to help you continue with your learning journey By the end of this book you'll be

able to build your own creative IoT based home automation system using different hardware and software technologies. What you will learn: Understand the fundamental concepts of home automation systems. Set up a home automation system using Home Assistant and Raspberry Pi. Create and configure ESP8266 based sensors to work with Home Assistant. Hack a commercial actuator to work with Home Assistant using Tasmota. Create automations, customize and use applications with Home Assistant. Leverage IoT software tools to take your home automation to the next level. Work on hands on projects including LED strip lights and an ESP32 five zone temperature logger. Explore home automation FAQs, emerging technologies and trends. Who is this book for? The book is for engineers, developers, students, makers and enthusiasts who are working on or interested in working with electronics and IoT devices, embedded systems, systems integration, computer software and coding to develop their own smart home automation systems. Technicians, teachers and other professionals who want to learn home automation related technologies will also find this book useful. Prior experience of working with Raspberry Pi, creating hardware prototypes and software programming will be beneficial.

Smart Systems for Industrial Applications

C. Venkatesh, N. Rengarajan, P. Ponmurugan, 2022-01-07. **SMART SYSTEMS FOR INDUSTRIAL APPLICATIONS**. The prime objective of this book is to provide an insight into the role and advancements of artificial intelligence in electrical systems and future challenges. The book covers a broad range of topics about AI from a multidisciplinary point of view, starting with its history and continuing on to theories about artificial vs human intelligence, concepts and regulations concerning AI, human machine distribution of power and control, delegation of decisions, the social and economic impact of AI, etc. The prominent role that AI plays in society by connecting people through technologies is highlighted in this book. It also covers key aspects of various AI applications in electrical systems in order to enable growth in electrical engineering. The impact that AI has on social and economic factors is also examined from various perspectives. Moreover, many intriguing aspects of AI techniques in different domains are covered, such as e learning, healthcare, smart grid, virtual assistance, etc. Audience: The book will be of interest to researchers and postgraduate students in artificial intelligence, electrical and electronic engineering, as well as those engineers working in the application areas such as healthcare, energy systems, education, and others.

Advances in Ergonomics in Design Francisco Rebelo, 2021-06-28. This book provides readers with a timely snapshot of ergonomics research and methods applied to the design development and evaluation of products, systems, and services. It gathers theoretical contributions, case studies, and reports on technical interventions focusing on a better understanding of human machine interaction and user experience for improving product design. The book covers a wide range of established and emerging topics in user centered design relating to design for special populations, design education, workplace assessment and design, anthropometry, ergonomics of buildings and urban design, sustainable design, as well as visual ergonomics and interdisciplinary research and practices among others. Based on the AHFE 2021 International Conference on Ergonomics in Design held virtually on 25-29 July 2021 from USA, the book offers a thought provoking guide.
