*Communicating Science to the Public* Leo Tan Wee Hin,R. Subramaniam,2014-07-24 This book explores effective approaches for communicating science to the public in developing countries Offering multiple perspectives on this important topic it features 17 chapters that represent the efforts of 23 authors from eight countries Australia Bangladesh India Ireland New Zealand USA Singapore and South Africa Inside readers will find a diversity of approaches to communicate science to the public The book also highlights some of the challenges that science communicators science policy makers science teachers university

academics in the sciences and even entrepreneurs may face in their attempts to boost science literacy levels in their countries. In addition, it shares several best practices from the developed world that may help readers create communication initiatives that can lead to increased engagement with science in communities in the Asia Pacific region and beyond. Given the pervasive influence of science and technology in today's society, their impact will only increase in the years to come as the world becomes more globalized and the economies of countries become more inter-linked. This book will be a useful source of reference for developing countries looking to tap into the potential of science for nation building and effectively engage their communities to better understand science and technology. *Supported by the Pacific Science Association Hawaii* [Drones - Various Applications](#) Dragan Cvetković, 2024-02-07

Although many believe that unmanned aerial vehicles or drones are a recent invention, unmanned flight has a rich history that goes all the way back to ancient times. The first systems that can be specified under the modern definition of unmanned aerial vehicles or drones include reconnaissance drones developed and deployed during the Cold War period. Today such systems have evolved and can have different designs. In the last twenty years, many drones with different aerodynamic characteristics, flight endurance methods, and places of launch and acceptance, and even more diverse purposes have been developed. The achievements of modern science, technique, and technology, especially in the field of microelectronics and control systems, have made it possible to design and manufacture drones that are capable of performing controllable flight in a wide range of altitudes, speeds, and distances while performing complex and diverse tasks with almost the same efficiency as well as manned aircraft. This book provides a comprehensive overview of drone technology and applications with chapters on the detection and classification of drones, issues related to electric unmanned aerial vehicles, integrating drones into educational curricula, and the uses of different types of drones in various situations among other topics. *Serving Teens and Adults on the Autism Spectrum* Carrie Rogers, 2020-10-01

Understand the unique needs of teens and adults with autism and how to adapt existing library programs to be more inclusive. Autism spectrum disorder is a lifelong condition, but programs and services are mostly for children. As this population ages and the number of adults receiving autism diagnoses grows, are public libraries serving this group? *Serving Teens and Adults on the Autism Spectrum* offers practical strategies for delivering better service to individuals with autism from library programming to technology collections, library volunteers, and the information desk. Relying on feedback and help from the autism community in her area, Carrie Rogers Whitehead created programs for children, teens, and young adults on the autism spectrum. In this book, she shares advice on developing programs that focus on teamwork, transitions, and social skills. She explains best practices for reference interviews and teaches readers how their libraries can partner with nonprofit and government entities to develop workforce skills and connect adults with autism to jobs. Ready-made program activities for teens and adults with autism make it easy for libraries to better serve this often misunderstood group. *Critical Issues in STEM Evaluation* Douglas Huffman, Frances Lawrenz, 2006-03-31

This volume of *New Directions for Evaluation* focuses on

evaluation of science technology engineering and mathematics STEM programs with special emphasis on evaluation of STEM education initiatives STEM evaluation has always been important given the issues facing public schools and the economic and social considerations of STEM fields But because these fields today face a variety of concerns this discussion of STEM evaluation is particularly timely Evaluation advances may contribute to STEM fields by helping programs address the challenges they face This volume presents multiple viewpoints and state of the art examples and methodological approaches in the hope that its chapters will contribute to the understanding of STEM evaluation STEM education STEM education evaluation and evaluation in general Overall this volume of *New Directions for Evaluation* may help not only to move the field to consider new methods and methodologies for engaging in evaluation but also to reconsider ideas of what it means to engage in scientific evaluation
